A. Recruiter
G4S
San Diego, CA
Full-time

Job Introduction:

Hiring Now!

The world's leading private security organization, G4S, has an immediate job opportunity for a Recruiter. As a Recruiter, you will be responsible for the process of recruiting personnel at the field office level. In addition, ensures that field office interviewing, advertising and selection processes comply with company's EEO and Affirmative Action policies and applicable federal, state, and local laws.

The Recruiter will actively recruit, host job fairs, open houses, hiring events, and connect with outreach organizations. Primary responsibilities include actively recruiting to fill critical staffing needs of G4S Secure Solutions USA throughout the designated

area(s) by proactively sourcing, screening and qualifying mid-level managers, security supervisors, security personnel and other positions as assigned.

Role Responsibility:

Specific Duties and Essential Functions:

- Actively engage with Operations and HR team members to identify staffing needs; monitor health of applicant flow into the Applicant Tracking System and take proactive measures to increase pipeline
- Screening, interviewing, sourcing, and recruiting management, supervisors and security personnel job applicants
- Track and maintain necessary data for compliance with OFCCP and EEO candidate data requirements
- Track and maintain necessary data to support candidate recommendations, summaries and debriefs
- Assist in creation of new job descriptions and advertisement requests
- Manage the Applicant Tracking System for designated areas as assigned
- Periodically assist with personnel onboarding, to include new hire orientation
- Actively seek out, organize and participate in job fairs, career expo, hiring events etc. and document all Outreach Efforts to comply with AAP reporting; develop and maintain outreach relationships and contacts with Disabled, Veteran, Female, and Minority Organizations and Agencies
- Oversee the recruiting of security personnel for start-ups for various local and national clients
- Approving purchase of recruiting advertisements (online and in print) and outreach programs within budgetary restrictions
- Approve methods for implementing Employee Referral/Bonus Program
- Ensure that field office advertising, interviewing, hiring and selection processes are in compliance with the company's EEO and Affirmative Action policies, and applicable federal, state and local laws

The Ideal Candidate:

Education, Licenses and Certifications Required

Must possess one or more of the following:

- Bachelor's Degree combined with one (1) year of Human Resources and/or Recruiting experience
- Associate's Degree combined with three (3) years of Human Resources and/or Recruiting experience
- High School diploma or equivalent combined with five (5) years of Human Resources and/or Recruiting experience

Type and Length of Specific Experience Required:

- Prior work experience conducting applicant sourcing, recruiting, screening and interviewing job applicants in a fast-paced work environment
- Prior work experience with creating, developing, and implementing high-volume, full-cycle best-in-class recruitment programs
- Working knowledge of employment laws and civil rights legislation as they pertain to recruitment, interviewing, and selection and placement process
- Proven experience developing active early employee engagement programs geared toward positive employee experience and the reduction of turnover
- Work history must include:
 - Excellent organizational skills that include the ability to multi-task and prioritize work
 - Demonstrated strength screening and interviewing job candidates
 - Strong candidate sourcing experience that includes both traditional and online resources
 - Sound understanding and use of Applicant Tracking Technology
 - Strong consultative, analytical and problem-solving skills
 - Ability to communicate effectively with leadership

Skills Required:

- Proficient computer skills including Microsoft Office
- Effective oral and written communication skills
- Active listening skills
- Ability to assess and evaluate situations effectively
- Ability to identify critical issues quickly and accurately
- Attention to detail

Other:

- Must be at least 18 years old or the minimum age required by the state, if higher
- Must be a U.S. citizen or a foreign citizen authorized to legally work in the United States
- Must submit to a pre-employment drug test
- Must be able to provide, upon job offer, a DD214 discharge document with discharge status indicated, if prior military

Physical Requirements and Environment:

- Environment: Office; minimal to no exposure to extreme temperatures is expected
- Major Activity: Working on PC while sitting, telephone use
- Physical efforts to carry out job duties: Limited, to include some standing, bending, limited stretching and reaching.

B. Global Security Operations Center Operator

G4S

Mountain View, CA

Full-time

Job Introduction:

Hiring Now!

The world's leading private security organization, G4S, has an immediate job opportunity for a Global Security Operations Center Operator. As a Global Security Operations Center Operator, you will work in an operation which provides a comprehensive monitoring approach to provide broad visibility of activity across the infrastructure of a high-profile client, and leverages intelligence from several systems and technology databases that provide advanced correlation and analysis capabilities to deliver a prioritized list of actionable security incidents to the client's Global Security Operations Team. Being a team member in the Global Security Operations Center provides an exciting opportunity to participate in real-world, high-profile projects of an entertainment industry leader.

Role Responsibility:

Specific Duties and Essential Functions:

- Answering Phones; Operate IP based telephone system
- Operating radio; use multi-channel communications
- Call logging and data entry
- Utilize closed circuit television for situational awareness, threat management, and investigative purposes
- Operations support, routing of call information to the appropriate units for action
- Following response protocols in a timely manner in regards to incidents, alarms, notifications, calls and other activities related to the GSOC and its role as a central alarm monitoring station
- Receive and respond to emergency and non-emergency calls from client employees, outside vendors, law enforcement, and the security field force via telephone, automated alarm monitoring and radio systems
- Ensure all systems, both hardware and software, are functioning properly
- Process and evaluate information received from all available sources, and respond with the appropriate communication and dispatch procedures
- Perform key access control functions, and running access control reports
- Oversee coordination with Security Operations staff to provide necessary documentation in support of uniformed guard force activity (e.g. Officer Dispatch, Incident Reporting, etc.)
- Familiar and capable of operating CCTV platforms

The Ideal Candidate:

Education, Licenses and Certifications Required:

- Must possess a high school diploma or equivalent
- Pass any State-required training or other qualifications for licensing

Type and Length of Specific Experience Required:

- Must possess a minimum of one year of security experience

- Work experience must include of the following:
- Ability to use logic and reasoning to reach conclusions and approaches to problems
- Demonstrated high level of competency with advanced computer systems (e.g., hardware, software and networks)
- Possession of highly proficient computer skills including Microsoft Office applications
- Ability to communicate effectively with Information Technology and Security Systems professionals
- Demonstrated ability to operate radio, telephone equipment and/or console monitors
- Flexibility to work various shifts and willingness to assist the team when needed
- Ability to adapt to a dynamic environment and working under extreme pressure

Skills Required:

- Proficient computer skills including Microsoft Office
- Effective oral and written communication skills
- Active listening skills
- Ability to assess and evaluate situations effectively
- Ability to identify critical issues quickly and accurately
- Attention to detail

Other:

- Must be at least 18 years old or the minimum age required by the state, if higher
- Must be a U.S. citizen or a foreign citizen authorized to legally work in the United States
- Must have demonstrated ability to operate radio, telephone equipment and/or console monitors
- Subject to a drug screen to the extent permitted by law
- Must be able to provide, upon job offer, a DD214 discharge document with discharge status indicated, if prior military

Physical Requirements and Environment:

- Environment: Office; minimal to no exposure to extreme temperatures is expected
- Major activity: Working on a PC while sitting, speaking, listening, observing
- Physical efforts to carry out job duties: Limited, to include some standing, bending, and limited stretching and reaching.

Regulatory Compliance Specialist
Verisk 3E
Carlsbad, CA
Full time

Company Description:
Verisk 3E delivers intelligent compliance solutions that empower companies around the globe to reduce risk, drive continuous improvement and create new growth opportunities. Verisk 3E has set the standard for combining regulatory expertise and enriched global compliance content and transforming it into actionable intelligence to enhance chemical and workplace safety, product safety and stewardship, supply chain stewardship and research and development support. Together, with our customers, we are working to make the world safer—one product, one workplace and one community at a time. To learn more visit www.verisk3e.com We are proud to be a part of the Verisk family of companies!

At the heart of what we do is help clients manage risk. Verisk (Nasdaq: VRSK) provides data and insights to our customers in insurance, energy and the financial services markets so they can make faster and more informed decisions.

Our global team uses AI, machine learning, automation, and other emerging technologies to collect and analyze billions of records. We provide advanced decision-support to prevent credit, lending, and cyber risks. In addition, we monitor and advise companies on complex global matters such as climate change, catastrophes, and geopolitical issues.

But why we do our work is what sets us apart. It stems from a commitment to making the world better, safer and stronger.

It's the reason Verisk is part of the UN Global Compact sustainability initiative. It's why we made a commitment to balancing 100 percent of our carbon emissions. It's the aim of our "returnship" program for experienced professionals rejoining the workforce after time away. And, it's what drives our annual Innovation Day, where we identify our next first-to-market innovations to solve our customers' problems.

At its core, Verisk uses data to minimize risk and maximize value. But far bigger, is why we do what we do.

At Verisk you can build an exciting career with meaningful work; create positive and lasting impact on business; and find the support, coaching, and training you need to advance your career. We have received the Great Place to Work® Certification for the fourth consecutive year. We've been recognized by Forbes as a World's Best Employer and a Best Employer for Women, testaments to our culture of engagement and the value we place on an inclusive and diverse workforce. Verisk's Statement on Racial Equity and Diversity supports our commitment to these values and affecting positive and lasting change in the communities where we live and work.

Verizon Jobs in CA

A. Senior Business Systems Administrator
Verizon
San Jose, CA

Job # 546642

Full time

What You'll Be Doing:

Verizon recently acquired BlueJeans and plans to transition BlueJeans employees into Verizon compensation and benefits programs. This position will be part of that planned transition.

Blue Jeans is changing business communications in a way that is more impactful and more powerful than ever before. Together, we help thousands of companies across the globe move their businesses forward, while fostering stronger employee engagement with easy, naturally collaborative video meetings and large-scale events.

Blue Jeans is seeking a Sr. Business Systems Administrator to join our team in San Francisco, reporting to the Director of Sales Strategy & Operations. You will play an integral role in the success of the Sales Organization and company through management of all sales tools, including Salesforce.com (SFDC).

- Assist in the design of the right sales tech stack based on organizational strategy, structure, and processes.
- Serve as the lead associate in the management of Salesforce.com and other sales tools for daily business management.
- Own and drive Salesforce.com enhancements designed to reduce sales rep friction, improve effectiveness, or both.
- Lead service delivery arm of sales operations team, supporting sales, lead generation, CSM, channel and technical sales functions.
- Handle day-to-day administration of SFDC including end-user support, record transfers, error troubleshooting, etc.
- Proactively identify obstacles or process inefficiencies and manage projects to streamline or automate sales processes.
- Effectively collaborate with other business partners and departments such as Finance, Marketing, Product Management, and offshore Developers.
- Continually evaluate performance of current tools and potential new tools.

You'll Need To Have

What we're looking for:

- Bachelor's degree or four or more years of work experience.
- Six or more years of relevant work experience.
- Experience in Sales / Business Operations.
- Proven ability to manage sales tools.

Even Better If You Have:

- Salesforce.com certification; SQL / BI tool experience at a SaaS company.
- Organization, attention to detail, and ability to manage multiple tasks and projects.
- Self-starter with a track record of creativity and innovation.
- Strong problem solving and analytical skills with great business sense.
- Comfort dealing with ambiguity.
- Ability to work independently in a dynamic, fast-paced environment and pick up new skill sets quickly.
- Oral and written communications skills.
- Strong interpersonal skills with demonstrated ability to present content to general audiences.

B. Member of Technical Staff Consultant-Systems Engineering

Verizon

San Diego, CA

Full time

Job # 548509

What You'll Be Doing:

Work on DDL/DML techniques, joins, sub-queries, passing variables, dynamic SQL, managing indexes and troubleshooting. Extract, Transform and load the data using SSIS in SQL Server and DTS (Data Transformation Services) in SQL Server. Use SSMA (SQL Server Migration Assistant). Integrate, and migrate data, Data mapping using Scribe Integration. Develop Business Intelligence solutions using MS SQL Server tools, including Reporting Services, Integration Services and Analysis Services. Perform Data Analysis, Normalization, Data warehousing, Data Cleansing, Data Modeling, Data Mapping in OLTP & OLAP environments. Develop stylish Dashboards, Drill Down, Cascading, Parameterized, Drill through, Sub reports and Charts using Global variables, Expressions

and Functions for the business users. Use Power BI graphical and visualization solutions for creating interactive dashboards. Design ETL packages dealing with different data sources (SQL Server, Flat Files, and XMLs etc.) and load the data into target data sources by performing different kinds of transformations using SQL Server Integration Services (SSIS). Develop Sites, Team Sites, Views, Alerts and Lists in SharePoint Programming experience using ASP.NET, VB.NET, HTML, and XML. Develop triggers and visual force pages in salesforce.com. Design user interface using HTML, CSS and BOOTSTRAP. Develop Web based business tools using ASP .NET MVC5 framework. Work using AWS services along with wide and in depth understanding of each one of them.

What We're Looking For:

Bachelor's or foreign equivalent degree in Computer Science, Computer Engineering or related field and 2 years of experience with software engineering including design, development and testing. Experience therein to include 2 years with database design and development; 2 years using SSIS, SSRS, and .NET Programming; 2 years with systems programming using C#, Java, salesforce.com APEX; 2 years with data analysis and statistics; and 1 year with distributed database development.

When you join Verizon:

You'll have the power to go beyond - doing the work that's transforming how people, businesses and things connect with each other. Not only do we provide the fastest and most reliable network for our customers, but we were first to 5G - a quantum leap in connectivity. Our connected solutions are making communities stronger and enabling energy efficiency. Here, you'll have the ability to make an impact and create positive change. Whether you think in code, words, pictures or numbers, join our team of the best and brightest. We offer great pay, amazing benefits and opportunity to learn and grow in every role. Together we'll go far.

C. Threat Intelligence Hunter

Verizon

Torrance, CA

Full-time

What you'll be doing.

The Verizon Threat Research Advisory Team within Verizon's Professional Services is seeking Threat Intelligence Hunters/Analysts (Analysts) who will play a critical role in protecting Verizon's customers, from current and future cyber threats. This position will support our customer's overall cyber threat analysis efforts.

- Apply scientific and technical knowledge to solving complex threat intelligence problems and produce strategic, operational and tactical level written assessments.
- Briefing organizations such as Fortune 500 companies on their findings and have enough understanding to answer tough questions by C-Level executives in the organization.
- Utilize understanding of the hacker mindset and methods used to carry out their objectives.
- Work independently and be self-motivated.
- Use experience and knowledge in identifying threats that pose a significant risk to their customer's organization to identify when there is no threat or risk at all.

What we're looking for.

You'll need to have:

- Bachelor's degree or four or more years of work experience.
- Four or more years of relevant work experience.
- Three or more years of experience researching, investigating and tracking threat actors and threat groups in the cybercrime ecosystem.
- Experience analyzing computer and network related data and logs to uncover threats and IOC's.

Even better if you have:

- Bachelor Degree (Computer Science, Cyber Security, Electronics, Investigations).
- Experience with intelligence analysis, including analytic tradecraft.
- Proven threat hunting experience (PCAP diagnoses).
- Data science and analytics experience including aggregating, manipulating, examining, mining, exporting, reporting, and visualizing threat intelligence and incident data.
- Knowledge of and experience with security monitoring methodologies such as packet capture, flow data (NetFlow), patterns, watch lists, black lists, log parsing, correlation, classification, event generation, taxonomy, filtering.

data transport. Enterprise and Application Services Domain Architects apply enterprise IT capabilities across the workforce, bringing integrated business value across functional and organizational boundaries to end users at all levels of the Navy and Marine Corps. B. Systems Administrator

Leidos

San Diego, CA

Potential For Telework: No

Clearance Level Required: Top Secret/SCI

Travel: Yes, 10% of the time

Scheduled Weekly Hours: 40

Shift: Day

Job Description:

Looking for work-life balance? Leidos offers an optional 9/80 schedule, accommodating flex-time and competitive leave benefits to help you juggle your personal and professional life. We are seeking a multi-talented Windows and Linux Systems Administrator to join our team. Relocation assistance is available to motivated candidates looking to grow their career in San Diego, CA. You must have an active DoD TS/SCI security clearance to be considered.

Job Summary

In this role, you are responsible for building and maintaining the fabric on which all other IT systems and services are built. You will be responsible for providing day-to-day Systems Administration for the Linux Virtual Machines (VMs) and installed hardware. You will also administrate and operate aspects of multiple systems and related software including Linux RHEL 6 servers in VMWare and Amazon Web Services hosted environments, Red Hat Enterprise Linux, and Windows servers. Some of your daily tasks include:

- Supports mission critical systems by providing technical expertise for server and database support and establishing innovative, time sensitive solutions.
- Analyzes and determines information needs and elements, data flow, storage requirements, and data output and reporting capabilities. Applies knowledge of systems to coordinate maintenance as well as implement changes/upgrades. Tests and implements technical solutions. Responsible to troubleshoot/provide root cause analysis, restore systems, monitor databases and to analyze and organize data and apply new technology designs and programs.
- Performs systems administration tasks including design, installation, maintenance, monitoring, recovery, rebuilding, upgrading, patching and performance tuning.
- Builds, deploys, and monitors, software baselines across multiple domains and environments, ensuring configuration and operability.
- Performs performance analysis and tuning, disaster recovery, and monitoring of data.
- Advises/participates in design of system architecture and infrastructure support systems.
- Supports application design by contributing expertise to applications, operations, and technical teams.
- Support all required pipeline environments by ensuring patch compliance, baseline software updates and system health/status checks are complete.
- Recommends guidance based on established procedures to ensure corrective actions are taken to restore environment functionality.
- Supports software integration, test automation and information assurance teams in accessing environments as well as maintain user accounts, passwords and access controls.
- Supports, troubleshoots and applies expertise regarding network issues between environments and system users.
- Responsibilities span multiple technical areas including ashore and afloat environments.
- Employs ingenuity and creativity to develop new technical solutions.

Required Qualifications:

- This position requires an active DoD TS/SCI security clearance; must be “SCI Eligible” in JPAS with a current Single Scope Background Investigation (SSBI)
- Bachelor’s Degree in Software Engineering, Computer Science, or relevant field and 8-12 years related experience including software installation and maintenance experience; additional relevant systems background, training or education may be substituted in lieu of direct experience.
- Must possess or have the ability to possess an IAT II certification level, i.e., Cybersecurity Workforce Credentials IAT 2 (Linux and or Windows OS and Security+ or equivalent).
- Strong background/certifications with installing and configuring software within Microsoft Windows Server and Red Hat Enterprise Linux operating systems.
- Experience with IPv4 and IPv6 networking, to include basic network switch and router troubleshooting.
- Experience in writing detailed installation, configuration and system administration guides.
- Experience with container based platforms, such as OpenShift.
- Experience with build automation support tools such as Jenkins or Nexus.
- Experience writing scripts for at least one operating system (Linux, Windows).
- Excellent written and verbal communications skills and will be required to have contact with both a project technical lead and be able to take direction from our Navy government lead.

Desirable Qualifications:

- Basic knowledge of automation tools and software such as Ansible, Puppet/Chef, Terraform, CloudFormation, Powershell.
- Knowledge of Agile Development methodologies.
- Experience with a version control system (e.g., Git)
- Experience with an issue/problem tracking system (e.g., Jira).
- Working knowledge of Information Assurance and Certification & Accreditation requirements as well as facility security requirements provided by SSC-PAC.
- Experience designing, installing and troubleshooting virtual and cloud data analytics environments, including the Navy Tactical Cloud Reference Implementation (TCRI) and the Agile Core Services (ACS) framework.
- Experience with Geospatial-based application development and web-portal frameworks such as Ozone Widget Framework highly desirable. E Experience as a tool administrator for Atlassian SCM tools suite.
- Experience designing, installing and troubleshooting virtual and cloud data analytics environments, including the Navy Tactical Cloud Reference Implementation (TCRI) and the Agile Core Services (ACS) framework.
- Proficiency with MS Office Products (i.e., Word, Excel, Visio, & PowerPoint).

C. Supervisory Team Lead, Subcontracts

LEIDOS

San Diego, CA

Potential For Telework: Yes

Clearance Level Required: None

Travel: Yes, 10% of the time

Scheduled Weekly Hours: 40

Shift: Day

Job Description:

The Defense Group of Leidos is seeking a Supervisory Team Lead, Subcontracts to support its C4ISR Solutions Operation. This role will lead full life cycle ("cradle-to-grave") subcontract management activities for various US and International government programs. This role will manage a team of approximately 7 subcontracts administrators and also own a portfolio of subcontract responsibilities. The Supervisory Subcontracts Team Lead is a working manager role.

The Supervisory Team Lead, Subcontracts will oversee and manage overall subcontract compliance for these programs in accordance with contract requirements, company policies and procedures, and applicable laws and acquisition regulations. The selected candidate will be a motivated leader and a self-starter who can work independently lead a team in a dynamic environment.

Primary Responsibilities

The Supervisory Team Lead, Subcontracts is responsible for managing staff, conducting performance reviews, establishing development actions, working activities that span the entire procurement cycle, including but not limited to: proposal support

activities to include negotiation of non-disclosure agreements (NDAs) and teaming agreements, preparation of solicitation packages to subcontractors, evaluation of subcontractor proposals, price analysis, negotiation of terms and conditions; award of subcontracts, subcontract administration, issue resolution, and closeout activities.

- Assigns work to and reviews the work of subcontract administrators
- Trains and mentors subcontract staff
- Negotiates NDAs and Teaming Agreements
- Audits team procurement files to ensure compliance with Leidos and Government requirements
- Creates moderate to complex RFP solicitations in accordance with Government and Leidos requirements
- Develops prime contract flow down documents
- Coordinates closely with the Contract Administrator assigned to program to ensure subcontracting activities and prime contract flow downs are carried out in a manner consistent with prime contract requirements and operational objectives
- Evaluates supplier proposal responses
- Conducts price and cost analysis
- Negotiates pricing and terms/conditions with subcontractors
- Administers subcontracts of various types and complexity
- Resolves subcontractor invoice issues
- Identifies and resolves moderate to complex issues and problems on assigned subcontracts and makes recommendations to management
- Performs subcontract close-out activities
- Analyzes risks and identifies risk mitigations.
- Acts as primary interface between subcontractors and the program for all subcontracts related issues
- Regularly interacts with program management, contracts, project control, finance, business development and with customers, as required
- Must have the interpersonal skills to deal effectively with subcontractor management regarding subcontract issues of varying degrees of complexity and the drive to work issues to resolution
- Works with team members to resolve issues/provide guidance on tasks described above

Basic Qualifications

- Requires a Bachelor's degree in Business Administration OR a related field with 5+ years of prior relevant experience OR Master's degree with 3+ years of prior relevant experience. Additional years of relevant experience will be accepted in lieu of degree
- Must be US Citizen
- Experience managing and training a team of 5 - 7 people
- Experience in subcontracting and related functions with particular emphasis on negotiation and subcontracts administration
- Experience negotiating terms and conditions
- Successful track record of managing a variety of subcontract types, interfacing with internal customers, other functional support staff, and suppliers
- Strong organizational, written, and oral communication skills
- Must be able to work independently, establish priorities, and meet deadlines with minimal supervision
- Ability to multi-task and work in a fast paced environment
- Working knowledge of the FAR and DFARS
- Proficient in Microsoft Excel, Word, and Deltek Costpoint
- Demonstrated ability to develop effective relationships internally and externally with subcontractors to drive results

Preferred Qualifications

- 2+ years of experience supervising or leading teams is a plus
- Demonstrated ability to effectively lead and/or manage change
- Demonstrated ability to build internal cross functional relationships
- Ability to develop and contribute to the execution of long-term strategies and tactical plans to achieve enterprise objectives

Leidos is a Fortune 500® information technology, engineering, and science solutions and services leader working to solve the world's toughest challenges in the defense, intelligence, homeland security, civil, and health markets. The company's 33,000 employees support vital missions for government and commercial customers. Headquartered in Reston, Virginia, Leidos reported annual revenues of approximately \$10.19 billion for the fiscal year ended December 28, 2018. For more information, visit www.Leidos.com.

- Maintain a high level of knowledge of warehouse operations, products.
- Ability to professionally lead staff by example and handle light supervisory duties. Familiar with training and coaching techniques.
- Ability to change or adapt work practices, priorities, or procedures.
- Ability to think and take constructive action in work-related matters.

B. Warehouse Associate I

HD Supply

Chatsworth, California

Full time

Job Summary:

Responsible for specialized warehouse tasks in loading, unloading, order pulling, shipping, returns, forklift, fabrication, counter, or may have a generalized role working in all departments.

Major Tasks, Responsibilities And Key Accountabilities:

- Complete tasks such as loading, unloading, sorting, picking, stocking, staging, fabrication and transportation of goods.
- Load and unload materials to and from designated storage area, such as racks, shelves, or vehicles. Stack or pile materials, such as lumber, boards, or pallets
- Install protective devices, such as bracing, padding, or strapping, to prevent shifting or damage to items being transported.
- Verify computations against physical count of stock.
- Maintains condition of work area (i.e. free of trash, product in correct location, etc.). Follows company safety policies and procedures and encourages other associates to do the same.
- Receive and fill orders or sell supplies, materials, and products to installers and subcontractors.
- May drive truck to pick up incoming stock or deliver materials to designated locations or operate forklift or other machinery in order to complete tasks.
- Performs other duties as assigned.

Nature and Scope:

- Selects correct processes from clearly prescribed rules, past practices, or instruction. Seeks advice and guidance on non-routine or problem areas from supervisor. Deviations from the norm are cleared by the supervisor.
- Under close supervision, exercises limited latitude/independent judgment. Work typically involves detailed checks or close review of output by a senior coworker and/or supervisor.

Microsoft aspires to help our customers achieve their own digital transformation, leveraging the power of Microsoft Cloud solutions and support offerings. To this end, Microsoft invests in a dedicated Customer Success team that will help Microsoft customers successfully realize their business outcomes.

As a Customer Success Account Manager (CSAM), you are the primary customer facing role responsible for customer success through the management of program deliveries and strong customer relationships. The prevailing business priority is the customers' successful adoption and productive use of Microsoft cloud technologies. You are front and center with our customers supporting their digital journey and empowering them to achieve more!

Responsibilities:

Customer Success Account Managers drive quality planning and delivery of Support services to realize customer business outcomes and overall experience with Microsoft solutions. You will partner with your customer and Account Team to prioritize and plan customer engagements and programs, driving outcomes to improve the health, performance, and business capabilities of the prioritized workloads. You will drive orchestration, customer sponsor management, and stakeholder communication of prioritized engagements and programs. The CSAM also tracks, escalates, and plans for the remediation of technical blockers and provides engineering feedback to further our product and solutions, as appropriate.

Role-specific Qualifications:

- Ability to deal with ambiguity, analytical problem solving, and leadership capability
- Demonstrated self-learner, seeks information about the underlying needs of customers, and builds customer/partner relationships
- Seeks opportunities to drive Microsoft Services business results by collaborating with multiple team members
- Product and technology expertise - A passion for technology and working with customers
- Need to be willing to travel 50-90% due to customer requirements for onsite service

Travel may be reduced due to local or national public health and safety standards.

***Customer Engineer

Overview:

Customer Engineers (CEs) are deep technical advisors supporting Enterprise customers to deliver unique value by removing blockers to consumption within their given Solution Area. CEs provide technical support including risk assessments and tuning to operate and optimize a customer's cloud or on-premises environment. The Customer Engineer provides support delivery services as well as technical readiness through a Customer's Support contract via dispatch by the account team. Customer Engineer services can be delivered either remotely or on-premises.

Responsibilities:

CEs participate in proactive account management, spot performance issues, analyze problems, develop solutions to meet customer needs and represent them. The CE provides the most effective method of service delivery by analyzing trends and common themes across customers and seeks information about the underlying needs of customers. CEs cultivate relationships, credibility, and loyalty with customers and partners intentionally by sharing relevant business expertise. The CE identifies opportunities to articulate business value and grow customer/partner relationships in alignment with Customer Success business priorities and stakeholder management principles.

Role-specific Qualifications:

- Ability to deal with ambiguity, analytical problem solving, and leadership capability
- Demonstrated self-learner, seeks information about the underlying needs of customers, and builds customer/partner relationships
- Seeks opportunities to drive Microsoft Services business results by collaborating with multiple team members
- Product and technology expertise - A passion for technology and working with customers
- Need to be willing to travel 50-90% due to customer requirements for onsite service

Travel may be reduced due to local or national public health and safety standards.

***Consultant

Overview:

Consultants are strategists who work closely with Microsoft's partners to assist customers in the delivery of high-quality engagements around Microsoft's solution areas, technologies, services and products in diverse client environments.

Responsibilities:

Consultants assist customers in stabilizing developed solutions using Microsoft methodologies in complex customer environments, in the design and development of integrated solutions using the latest Microsoft products, services and technologies and understanding the relevant application development, infrastructure and operations implications of the developed solution.

Role-specific Qualifications:

- Ability to deal with ambiguity, analytical problem solving, and leadership capability
- Demonstrated self-learner, seeks information about the underlying needs of customers, and builds customer/partner relationships
- Seeks opportunities to drive Microsoft Services business results by collaborating with multiple team members
- Product and technology expertise - A passion for technology and working with customers
- Need to be willing to travel 50-90% due to requirements for onsite service

Travel may be reduced due to local or national public health and safety standards

***Project Manager

Overview:

Project Managers display an unusual mix of project management and consulting skills, along with a passion for technology to ensure a project's success with our customers.

Responsibilities:

Project Managers are responsible for keeping the project team working on the highest priority tasks, removing risks and impediments, maintaining on track financials and leading the communication with stakeholders and the end customer. As a trusted advisor to our customers, Project Managers are responsible for the successful execution of one or more projects at a time, providing guidance, coaching, and project leadership. Project Managers mentor and influence to drive the highest quality and the strongest sense of customer focus on each project, while helping to achieve both customer satisfaction and financial targets.

Role-specific Qualifications:

- A good understanding of business, specifically with Fortune 500 companies and the relationship between business and technology
- Ability to deal with ambiguity, analytical problem solving, and leadership capability
- Demonstrated self-learner, seeks information about the underlying needs of customers, and builds customer/partner relationships
- Seeks opportunities to drive Microsoft Services business results by collaborating with multiple team members
- Product and technology expertise - A passion for technology and working with customers
- Need to be willing to travel 50-90% due to customer requirements for onsite service

Travel may be reduced due to local or national public health and safety standards

***Support Engineer

Overview:

Support Engineers serve as the first point of contact for Microsoft's customers and partners via phone, email or web. They deliver unique value by collaboratively and reactively solving customer problems, providing proactive support advice, contributing to product quality and enhancements and creating self-help assets to broadly reach more customers.

Responsibilities:

Using technical expertise and excellent communication skills, Support Engineers are responsible to fix real time issues, collaborating directly with the customers and other support professionals to help customers solve business problems. Support

SPECTRUM

San Diego/San Marcos/Riverside/El Segundo, CA

Full-time

At A Glance:

- Full-time sales role good for students, grads, and people who appreciate flexibility, with potential for advancement and no ceiling on commission bonuses.
- A role that is ideal for flexible, goal-oriented communicators who thrive on meeting new people and being on the move.
- Benefits include paid comprehensive training and time off, excellent health packages, free Spectrum services, Education Assistance, unlimited mileage reimbursement and more.***

Get Up To Speed:

At first, you'll run through some virtual training programs, then jump right in to see how our expert Reps get business done. Our hands-on training philosophy lets you partner with established pros to learn how to close the deals in no time. Even after training you'll have the continuing support and encouragement of your peers and mentors whenever you need it.

You Have Unlimited Potential:

As a Spectrum Outside Sales Representative, you're guaranteed a steady paycheck from the moment you start training. But that's just the beginning: The potential for earning is unlimited. Commission bonuses grow with every new deal. And with our unlimited mileage reimbursement, we're looking out for you at every turn.

It's An Especially Good Time To Join Spectrum:

We're sharing our success with the people who help us achieve it. And right now we're offering additional \$2,500 training bonuses for new Outside Sales Representatives.

We'll Have Your Back

At Spectrum, training and teambuilding are priorities. We want you to succeed, so we offer support like:

- Peer mentoring and regular group huddles to talk tactics and celebrate wins
- Regular training refreshers
- Solid leads to give you a strong start Soon you'll be an authority on Spectrum's products and services, fielding customer questions and helping them pick out the best packages for their lifestyles.

Keep Moving Forward:

Do you think fast on your feet? If you're motivated, you can go far with Spectrum. We appreciate enthusiasm and dedication; you can see it in the fact that nearly all of our Sales Managers started as Representatives themselves. What they learned on the job made them talented leaders and Sales standouts. It also means they understand exactly what you'll need to succeed in this role, so they can guide you until you're ready to take the lead yourself.

Your Neighborhood, Your Open-Air Office:

Learn about your community while delivering advanced TV, high-speed Internet and Voice technologies, matching your neighbors with the customized services that best fit their needs and lifestyles. This is an excellent opportunity for someone who enjoys being out of the office and on the move. It's the freedom of self-employment without the risks of running your own business.

How About Those Benefits?

There are so many outstanding benefits to working with Spectrum, like retirement savings, paid time off, child care reimbursement, travel reimbursement, and more.

Here's What You Need to Get Started

The minimum requirements for Outside Sales Representatives are:

- Willingness to work flexible hours, including evenings
- Valid driver's license, car insurance, a satisfactory driving record, and use of a reliable personal vehicle
- Motivation to sell door-to-door in residential areas
- Ability to work outdoors in all adverse weather conditions
- Engaging interpersonal skills

B. Field Technician II - Riverside

Spectrum

Riverside, CA

Full-time

Client Reference Code: 266598

Job Code: TCB170 Field Technician II Nonexempt

What is your goal?

If you're like a lot of people, you want a career that can grow with you. Spectrum Field Technicians come from all kinds of backgrounds and experience levels. If you're new to the role, enter our training program enthusiastic to learn our systems, services and equipment. If you have experience, continue to increase your knowledge to get comfortable with our expanding and evolving range of tools and techniques. Find lasting success and create quality customer relationships. Build your skills to become a valued member of our team and a reliable face in the community. The knowledge you gain here can take you far.

What is the role?

Getting started as a Field Tech means getting up-to-date with all that Spectrum has to offer. As we continue to update our tools, technology and efficiencies, we'll teach you to install and service a range of Spectrum products. You'll get at least four weeks of fully paid, hands-on training with power tools cable and telecom equipment, meters and apps, computer software and more. You'll get to develop pole climbing and ladder skills safely and effectively right at our training facility. We provide all the gear you'll use, and the knowledge you gain will make you a valued professional. There's also support after you have completed training in case you need a quick refresher or higher-level backup.

Climb the Ladder at Spectrum:

Are you ready to see how far you can go? There are opportunities to grow and succeed at Spectrum, and we're proud when our people achieve more. It shows in the fact that so many of our Field Operations supervisors, managers, and directors started as Field Techs themselves. They know exactly what it takes to thrive and how to best support their team, whether that means onsite backup or being available to talk through issues. Join our apprenticeship program for support moving up with training and experience. Build a strong foundation for a career that progresses as you do.

The benefits are clear:

In addition to the core benefits - industry-leading retirement savings and 401(k) plans, comprehensive healthcare insurance options, dental and vision plans, flexible spending, family leave, and paid training and time off - we offer free Spectrum products and services where available, tuition reimbursement, employee discounts, and a selection of other programs to support team members and their families. Have previous technical experience and (or) knowledge? Starting salary will be based on level of experience.

Physical Requirements:

This is a physical job, so you must have the ability to do the following:

- Move over, and possibly under, different types of terrain in all-weather while carrying tools and equipment.
- Ability to operate and lift weight-bearing equipment, such as customer premises equipment, gaffs, safety harnesses, extension ladders (that can weigh up to 75 pounds and extend 28 feet).

Technical Requirements:

Additional necessary skills and abilities include:

- A willingness and ability to learn to use handheld devices and operate computer or test equipment. These can include signal level meters, pressure testers, ohm meters, handheld applications, a laptop computer and software.
- Familiarity with computer operating systems and a variety of consumer communications devices, such as smartphones, routers, modems, converters, and wireless devices.
- A valid driver's license with satisfactory driving record within company-required standards. Travel to and from assigned territories and company facilities, including during inclement weather, is essential.

In The Field:

Every day brings something different, so Field Techs should be comfortable working in a lot of different settings, for example:

- High, outdoor places like telephone poles and rooftops, in all weather conditions, possibly for extended periods of time.

- In residences, potentially in poorly ventilated areas such as attics, basements and/or crawlspaces where there may be dust, dirt, noise, insects, rodents, pets, and cleaning solutions.
- Consistent and punctual attendance. The ability to work overtime, weekends, second shift or participate in an on-call rotation when scheduled.
- Out of the box thinkers. You must be able to work with little supervision and have the ability to apply common sense, experience, and theory towards problem solving and decision making.

Spectrum is the nation's fastest growing TV, internet and voice company. We're committed to integrating the highest quality service with superior entertainment and communications products. Spectrum is at the intersection of technology and entertainment, facilitating essential communications that connect 24 million residential and business customers in 41 states.
