

HD Supply Jobs in CA

A. Warehouse Associate II

HD Supply

San Diego, CA

Full-time

Job ID: 2020-39290

Remote Position?: No

Job Summary:

Responsible for specialized warehouse tasks in receiving, inventory, customer service, and/or order processing.

Major Tasks, Responsibilities and Key Accountabilities:

- Receives, counts and records shipment data into the system. Matches packing list information to actual packed merchandise. Prepares packages/merchandise for storage.
- Record receiving data using computer.
- Pack, unpack, and mark stock items, using identification tag, stamp, or electronic marking tool or other labeling equipment
- Identify incorrect/short shipped items and immediately notify supervisor.
- Deliver products, supplies, and equipment to designated area. May operate forklift or other machinery in order to complete tasks.
- Verify computations against physical count of stock. Examine and inspect stock items for wear and defects.
- Maintains condition of work area (i.e. free of trash, product in correct location, etc.). Follows company safety policies and procedures and encourages other associates to do the same.
- May perform order layout and make changes to carriers or picking method. Performs other duties as assigned.

Nature and Scope:

- Refers complex, unusual problems to supervisor.
- Under general supervision, exercises some judgment in accordance with well-defined policies, procedures, and techniques. Work typically involves regular review of output by a senior coworker or supervisor.
- None.

Work Environment:

- Typically located in a comfortable environment but with regular exposure to factors that may cause noticeable discomfort or a moderate risk of accident or illness, such as temperature extremes, moving machinery, loud noises, and fumes.
- Ability to lift and carry up to 50 pounds in a physical environment. Ability to stand for periods of time up to and exceeding 60 minutes. Ability to make repetitive movements, such as using a 10-key or calculator, bending, or squatting.
- Typically requires overnight travel less than 10% of the time.

Education and Experience:

- HS Diploma or GED strongly preferred. Specialized skills training/certification may be required. Generally 2-5 years of experience in area of responsibility.

Preferred Qualifications & Job Specific Details

Preferred Qualifications:

- Knowledge of machines and tools.
- Computer experience.
- Time management and organization skills.
- Ability to understand written material and basic math skills
- Interpersonal and communication skills. Ability to work with others in a group, cooperate with others, offer to help when needed, and foster a team climate within the group where members are committed to a common goal.

B. Stocker

HD Supply

Ventura, CA

Full-time

Job ID: 2020-39289

Remote Position? No

Job Summary:

Responsible for specialized warehouse tasks in loading, unloading, order pulling, shipping, returns, forklift, fabrication, counter, or may have a generalized role working in all departments.

Major Tasks, Responsibilities and Key Accountabilities:

- Complete tasks such as loading, unloading, sorting, picking, stocking, staging, fabrication and transportation of goods.
- Load and unload materials to and from designated storage area, such as racks, shelves, or vehicles. Stack or pile materials, such as lumber, boards, or pallets
- Install protective devices, such as bracing, padding, or strapping, to prevent shifting or damage to items being transported.
- Verify computations against physical count of stock.
- Maintains condition of work area (i.e. free of trash, product in correct location, etc.). Follows company safety policies and procedures and encourages other associates to do the same.
- Receive and fill orders or sell supplies, materials, and products to installers and subcontractors.
- May drive truck to pick up incoming stock or deliver materials to designated locations or operate forklift or other machinery in order to complete tasks.
- Performs other duties as assigned.

Nature and Scope:

- Selects correct processes from clearly prescribed rules, past practices, or instruction. Seeks advice and guidance on non-routine or problem areas from supervisor. Deviations from the norm are cleared by the supervisor.
- Under close supervision, exercises limited latitude/independent judgment. Work typically involves detailed checks or close review of output by a senior coworker and/or supervisor.
- None.

Work Environment:

- Typically located in a comfortable environment but with regular exposure to factors that may cause noticeable discomfort or a moderate risk of accident or illness, such as temperature extremes, moving machinery, loud noises, and fumes.
- Ability to lift and carry up to 50 pounds in a physical environment. Ability to stand for periods of time up to and exceeding 60 minutes. Ability to make repetitive movements, such as using a 10-key or calculator, bending, or squatting.
- Typically requires overnight travel less than 10% of the time.

Education and Experience:

- HS Diploma or GED strongly preferred. 0-2 years of experience in area of responsibility.

B. Mid-Level Cyber Security Specialist

Boeing
El Segundo, CA
Full-time

At Boeing, we are all innovators on a mission to connect, protect, explore and inspire. From the seabed to outer space, you'll learn and grow, contributing to work that shapes the world. Find your future with us.

Boeing Security is seeking a detail-oriented and self-motivated Mid-Level Cyber Security Specialist to support Department of Defense (DoD) and Special Access Program (SAP) activities. This position will be located in El Segundo, CA, Seal Beach, CA, or Huntington Beach, CA.

Position Responsibilities:

- Contributes to the development and deployment of program information security for assigned systems to meet the program and enterprise requirements, policies, standards, guidelines and procedures.
- Implements Assessment and Authorization (A&A) processes under the Risk Management Framework (RMF), as well as product development and product maintenance for assigned systems.
- Performs security compliance continuous monitoring (CONMON).
- Participates in security assessments and audits.

Additional Responsibilities:

- Prepares and presents technical reports and briefings.
- Contributes to the identification of root causes, the prioritization of threats, and recommends/ implements corrective action.
- Provides mentoring and technical leadership within the information security program team.
- Explores the enterprise and industry for the evolving state of industry knowledge and methods regarding information security best practices.
- Supports development of enterprise-wide information security policies, standards, guidelines and procedures that may reach across multiple stakeholder organizations.

This position requires an active Secret U.S. Security Clearance. (A U.S. Security Clearance that has been active in the past 24 months is considered active.)

Basic Qualifications (Required Skills/Experience):

- Current IAM Level 1 DoD 8140.01 (previously 8570.01) compliant certification or higher (i.e. CAP, GSLC, Security+ CE, CISSP, CASP, CISM, GSLC)
- 1+ years of experience in utilizing security relevant tools, systems, and applications in support of Risk Management Framework (RMF) to include: NESSUS, ACAS, DISA STIGs, SCAP, Audit Reduction, and HBSS

Preferred Qualifications (Desired Skills/Experience):

- Experience working within the National Industrial Security Procedures and Operations Manual (NISPOM)
- Experience in policies and implementation of Risk Management Framework (RMF)

Typical Education & Experience:

Education/experience typically acquired through advanced technical education (e.g. Bachelor) and typically 5 or more years' related work experience or an equivalent combination of technical education and experience (e.g. Masters with 3 years' related work experience, PhD with 1+ years' related work experience, etc.).

Relocation:

This position does not offer relocation. Candidates must live in the immediate area or relocate at their own expense.

C. Financial Controls Analyst

Boeing

El Segundo, CA

Full-time

At Boeing, we are all innovators on a mission to connect, protect, explore and inspire. From the sea bed to outer space, you'll learn and grow, contributing to work that shapes the world. Find your future with us.

Boeing is seeking a Financial Analyst to join our Phantom Works (PW) portfolio team in El Segundo, CA supporting revenue generating and New Business Funds (NBF) projects. You will support PW Financial integration with PW/BDS partners. As the Financial Controls Analyst, you will have the opportunity to work with numerous teams across PW Finance, Business Units and Subsidiaries as well as lead, coordinate and facilitate actions between technical teams. Phantom Work's vision is to be the Global innovation leader creating world-class solutions that matter to our customers and the world.

Responsibilities:

- Work within Finance and Functional disciplines to guide portfolio execution and reporting.
- Lead revenue and earnings forecast updates, including opportunity & risk reporting for the portfolio and provide ad hoc support including business case analysis, earned value management (EVM), cost charging issues, etc.
- Support the PW portfolio leaders and VP as required for capital investment requests.
- Support company investment NBF projects as required to include Bid & Proposal and Internal Research and Development activities.
- Work closely with the Technical community, Executive and Senior Leaders to provide financial insights that inform and drive business performance.
- Drive business operations, cross-functional communication, and program execution
- Manage revenue forecasts, capital assets, budget & cost pools, resource (labor, material, other costs) plans as well as proposals, contracts acquisition and compliance.

This position requires an active Top Secret US Security Clearance. (A U.S. Security Clearance that has been active in the past 24 months is considered active.)

Basic Qualifications (Required Skills and Experience):

- Bachelors Degree
- 10 or more years of experience in a finance related position such as Financial Operations, Cost Management, Accounting, Estimating, Financial Planning, Contracts or Procurement Financial Analysis (PFA)
- 5 or more years of experience working with technical, managerial and executive levels and leading presentations to them
- Experience with overhead management, rate management, and the capital process
- Experience in forecasting, developing long range business plans and using the opportunity and risk system
- Experience and/or training on FAR and DFARS compliance
- Knowledge of various contract types for example: Time & Materials, Firm Fixed Price, Cost Plus type Government contracts, etc.
- 5 or more years of experience working with the planning & scheduling processes, cost analysis, and EVMS
- Current and active Top Secret US Government Security Clearance

Preferred Qualifications (Desired Skills and Experience):

- A current and active U.S. Top Secret/SCI Security Clearance.
- Extensive expertise in commercial and government contracting.
- Experience with Government contract financial reporting via Contract Data Requirements List (CDRLs)

Qualifications:

- Bachelor's degree or equivalent experience required
 - Series 7 & 66 licenses strongly preferred - must successfully obtain within 180 days from start
 - Proven ability to work independently and competently handle multiple responsibilities, with a high degree of accuracy, in a high pressure environment.
 - Highly proficient user of Word, PowerPoint and Excel
- JPMorgan Chase & Co., one of the oldest financial institutions, offers innovative financial solutions to millions of consumers, small businesses and many of the world's most prominent corporate, institutional and government clients under the J.P. Morgan and Chase brands. Our history spans over 200 years and today we are a leader in investment banking, consumer and small business banking, commercial banking, financial transaction processing and asset management.

B. Chase Wealth Management Private Client Advisor

JP Morgan Chase Bank

San Francisco, CA

Full-time

As part of Consumer Banking, the branch-based Chase Wealth Management Private Client Advisor offers comprehensive financial planning and advice to individuals and families. Your expertise will support a wide range of clients, from those just starting to save to those with significant wealth. You are responsible for providing an exceptional investor experience by offering advised solutions and Chase partner referrals that deepen client relationships.

What you will possess:

Teamwork and Influence. You champion and support your teammates' success and the goals of the bank, while fostering a culture of diversity and inclusion.

Disciplined Practice Management. You focus on relationship management not portfolio management. You demonstrate a deep understanding of financial markets and sound business judgement. You'll rely on your personal drive, leadership and relationship-building skills to build a book of business and deliver personalized investment solutions to your clients.

Customer Obsession. You exhibit unwavering integrity that points toward doing right by clients at every opportunity. Insights, interpersonal skills and meticulous planning allows you to support and guide your customers. You have a passion for educating clients on the technology and channels available to them to better monitor, maintain, and handle their investments.

One Chase Approach. You provide a holistic view of clients' needs and financial coaching beyond investments. You will embrace digital innovations so you can help clients become more digitally confident and bank when, where and how they want.

What you will receive:

- Comprehensive compensation that includes a base salary, monthly incentives based on revenues and a Net New Money award annually.
- JPMorgan Chase is committed to providing a vast set of benefits choices as well as a Wellness Program to help you and your family get healthy and stay healthy.
- As an additional complement to the benefit plans, we offer a variety of additional programs and services to help meet the diverse needs of our employees, including 401k (for eligible employees), Employee Stock Purchase Plan, Employee Discount Programs, Business Resource Groups, Backup Child Care, Tuition Assistance Programs and Career Management, just to name a few.

Qualifications

Licenses, Designations, and Education:

- At least 2 years in a Financial Advisor role or equivalent financial services experience
- Demonstrated success in client acquisition, cultivating and maintaining client relationships, and integrating with key partners
- Demonstrated ability and commitment to goals-based planning and advice
- A valid and active Series 7
- A valid and active Series 66 (63/65) license is required or must be obtained within 60 days of starting in the role as a condition of employment

- A valid and active Life, Health and Long Term Care Insurance license is required or must be obtained within 60 days of starting in the role as a condition of employment
- Certified Financial Planning (CFP®) certification is preferred
- Bachelor's degree preferred

INVESTMENT AND INSURANCE PRODUCTS ARE:

- NOT FDIC INSURED
- NOT INSURED BY ANY FEDERAL GOVERNMENT AGENCY
- NOT A DEPOSIT OR OTHER OBLIGATION OF, OR GUARANTEED BY, JPMORGAN CHASE BANK, N.A. OR ANY OF ITS AFFILIATES
- SUBJECT TO INVESTMENT RISKS, INCLUDING POSSIBLE LOSS OF THE PRINCIPAL AMOUNT INVESTED

Investment products and services are offered through J.P. Morgan Securities LLC (JPMS), a registered broker-dealer and investment advisor, member of FINRA and SIPC. Annuities are made available through Chase Insurance Agency, Inc. (CIA), a licensed insurance agency, doing business as Chase Insurance Agency Services, Inc. in Florida. JPMS, CIA and JPMorgan Chase Bank, N.A. are affiliated companies under the common control of JPMorgan Chase & Co. Products not available in all states. Chase is a leading financial services firm, helping nearly half of America's households and small businesses achieve their financial goals through a broad range of financial products. Our mission is to create engaged, lifelong relationships and put our customers at the heart of everything we do. We also help small businesses, nonprofits and cities grow, delivering solutions to solve all their financial needs.

C. Relationship Banker (2)

JP Morgan Chase Bank

Ramona/San Jose, CA

Full-time

You're a natural leader. You do what's right - for customers and colleagues - and you love to inspire others to do the same. You have a knack for motivating and leading teams to create an exceptional customer experiences that cultivate long-lasting relationships. Apply these skills to become a Branch Manager and play a key role in ensuring our Customer Promise comes to life for our clients.

Do you have a passion for helping customers, building relationships and delivering extraordinary customer service?

We're looking for energetic, enthusiastic people to be the face of Chase to our retail branch customers. From a personal standpoint, you'll also have the opportunity to take ownership of your career development through a variety of cross-training opportunities.

As a Relationship Banker in our Branch Banking team, you'll take a lead role in delivering an outstanding experience to Chase customers. You'll acquire, manage, and retain meaningful relationships with our customers, using your financial knowledge to offer thoughtful solutions to help address their financial needs. As such, an employment offer for this position is contingent on JPMC's review of your criminal conviction history, credit report, information available through NMLS, and any other information relevant to a determination by JPMC that you demonstrate financial responsibility, good character, and general fitness for the position.

Your continued employment in this position would be contingent upon compliance with Truth in Lending Act/Dodd Frank Loan Originator requirements. In addition, this position requires National Mortgage Licensing System and Registry (NMLS) registration under the SAFE Act of 2008. As such, upon active employment with JPMorgan Chase, you will be required to either register on NMLS, or to update your existing registration as necessary to grant access to and reflect your employment with JPMorgan Chase. Your continued employment in this position with JPMorgan Chase is contingent upon compliance with the SAFE Act, including successful registration immediately after your start date, and timely completion of annual renewal and required updates thereafter. Any information obtained during the registration, update, and renewal processes or through NMLS notifications may impact your employment with the firm. Any of the completed information you provide during the Chase on-line application process may be transferred, on your behalf, to NMLS by JPMorgan Chase.

Please carefully review the information you provide to Chase for accuracy and consistency and with any current NMLS record, if applicable, before submitting. Chase is a leading financial services firm, helping nearly half of America's households and small businesses achieve their financial goals through a broad range of financial products. Our mission is to create engaged, lifelong

relationships and put our customers at the heart of everything we do. We also help small businesses, nonprofits and cities grow, delivering solutions to solve all their financial needs.

D. Lead Associate Operations - Sorrento Valley

JPMorgan Chase & Co.

San Diego, CA

Full time

As a Lead Associate Operations on a Branch Banking team you will support the Branch Manager and Associates to ensure customer financial transactions are completed accurately and efficiently, while complying with all policies, procedures and regulatory banking requirements. Apply these skills to become a Lead Associate Operations at Chase and help impact the customer banking experience.

Responsibilities:

You'll contribute significantly to the success of your branch by helping with the following:

- Work with the branch manager to set the tone of the branch environment to provide an exceptional customer experience and a dynamic and engaging culture
- Process and assist customers with transactions
- Introduce customers to your branch team who will build relationships and assist with specialized financial needs
- Make customers' lives easier by sharing and setting up self-service options to access their accounts 24 hours a day/7 days a week
- Support the Branch Manager with all aspects of branch operations, including loss control, compliance and audit standards

Qualifications:

- Demonstrated ability to make connections, engage and educate customers, and refer as appropriate
- Strong desire and ability to influence, educate and connect team, partners, and customers to technology
- Demonstrated leadership abilities; work well in a team environment
- Demonstrated proficiency in operations and transaction accuracy
- Minimum two years of branch banking experience preferred; Teller and/or Personal Banker experience is a plus
- Detail-oriented, organized and able to multi-task; able to follow policies, procedures, and regulatory banking requirements
- Some college level or military equivalent strongly preferred; High school degree, GED or foreign equivalent required
- Availability to work branch hours, including weekends and some evenings.

E. Military Pathways - Direct Hire Program -Business Banking- Business Relationship Manager

JPMorgan Chase & Co.

San Diego, CA

Full time

The JPMorgan Chase & Co. Military Pathways Direct-Hire Program is a highly selective program that connects top veteran talent to essential roles at JPMC and provides candidates the training, support and exposure they need to grow into future leaders across our most demanding businesses. Military Veterans have a unique set of experiences and leadership abilities that are greatly valued in our organization.

As a member of the Military Pathways Direct-Hire Program, you will receive:

- Induction training and acclimation support in your first month on the job
- 12-months of program support, coaching and career development from our dedicated Pathways team
- Networking opportunities with your Pathways colleagues
- Exposure to senior members of the business
- Professional skills training throughout the year to complement your on-the-job experience

This approach will enable you to create a network and set you up for success as you enter your career at JPMC.

As a Pathways Direct-Hire, you will be placed in a role based on professional experience and business priorities, focused on one of a few areas including: Asset & Wealth Management, Consumer & Community Banking, Commercial Banking, and Corporate & Investment Banking.

To ensure continuous development throughout the program, each candidate will receive mentorship, guidance, and support from your individual manager, program manager, veteran sponsor and many other influential business partners across the firm.

As a Business Relationship Manager (BRM), you'll be helping to improve the lives of our clients and the well-being of their businesses through financial solutions, education, and advice. The BRM manages a portfolio of business clients by building relationships and providing financial advice with a focus on client experience and risk management. Business Banking is looking for a BRM to develop new business and deepen existing relationships to position Chase as the primary bank for our clients.

Responsibilities:

- Provide the best in client advice and service while developing the relationship to ensure a seamless client experience throughout Chase
- Acquire, manage, and retain a portfolio of 70 – 90 business clients with annual revenue of \$1 - \$5 million for your assigned branches; provide deposit and cash management solutions and manage credit opportunities up to approximately \$500,000
- Deliver an outstanding experience to Chase business clients by providing comprehensive and customized business banking solutions tailored to the financial needs and circumstances of their businesses. Use knowledge of business, finance, banking, credit, and risk management to identify, recommend, and promote solutions that best serve the client and ensure the profitability of the portfolio. Work within risk parameters that protect the bank. Seek out expertise of others to enhance existing knowledge and ensure a positive client experience
- Regularly conduct in-person calls with prospects, centers of influence (COIs), and existing clients at their places of business
- Identify and pursue potential new business clients, looking for ways to cultivate long-term, primary banking relationships
- Identify the personal financial goals and needs of business clients; build collaborative relationships with partners across lines of business (Chase Wealth Management, Home Lending, Branch Teams) to connect clients with specialists who can help meet their financial needs
- Provide leadership by actively supporting your assigned branches
- Protect the firm by following sound risk management protocols and adhering to regulatory requirements
- Follow a disciplined relationship development process by identifying steps/strategies necessary to effectively maintain and build relationships with clients and prospects. Regularly review processes and strategies with manager, making adjustments as needed

U.S. Military Veteran Applicant Qualifications

Qualifications:

- Enlisted/Junior Officer background with 4+ years of Military experience
- BA/BS required
- 0-5 years of separation from military service
- Demonstrated learning agility
- Strong written and verbal communication skills
- Forward thinking and able to work through complex and unpredictable circumstances
- Ability to adapt to change and achieve positive business outcomes
- Ability to participate in scheduled Virtual Induction training in November, 2020.

BRM I Qualifications:

- 1-3 years of experience in a business banking relationship management role or related business lending experience; direct in-person contact preferred
- Bachelor's degree in Finance or related field or equivalent work experience strongly preferred
- Understanding of core business products and services
- General business experience and knowledge of business credit
- Strong communication skills with individuals at all levels, internally and externally
- Ability to build relationships with clients and internal partners
- Ability to recognize an issue or problem and determine when to escalate or handle independently
- Ability to balance needs of clients with associated risks and interests of the firm
- Ability to determine and balance priorities on a daily basis to achieve business objectives
- Demonstrated ability to own problems on clients' behalf and follow through with commitment
- Understanding of general business practices and how business needs vary by industry/market
- Strong current business network preferred
- Highly proficient in MS Office tools including Outlook, Excel, Word, and PowerPoint
- Ability to travel occasionally for key business meetings and training

F. Relationship Banker - Foster City

JPMorgan Chase & Co.
San Mateo, CA
Full time

Do you have a passion for helping customers, building relationships, and delivering extraordinary customer service? We're looking for energetic, enthusiastic people to be the face of Chase to our retail branch customers.

From a personal standpoint, you'll also have the opportunity to take ownership of your career development through a variety of cross-training opportunities.

As a Relationship Banker in our Branch Banking team, you'll take a lead role in delivering an outstanding experience to Chase customers. You'll acquire, manage, retain meaningful relationships with our customers, using your financial knowledge to offer thoughtful solutions to help address their financial needs. You'll contribute to the success of the branch by:

- Managing assigned customers and proactively meeting with them - in person and over the phone - to build lasting relationships, discover financial needs, and tailor product and service recommendations
- Making lives of customers easier by sharing and setting up self-service options to access their accounts 24 hours a day/7 days a week
- Partnering with Specialists (Financial Advisors, Mortgage Bankers, and Business Relationship Managers) to connect customers to experts who can help them with specialized financial needs
- Adhering to policies, procedures, and regulatory banking requirements

This position is subject to the Dodd Frank/Truth in Lending Act qualification requirements for Loan Originators. As such, an employment offer for this position is contingent on JPMC's review of your criminal conviction history, credit report, information available through NMLS, and any other information relevant to a determination by JPMC that you demonstrate financial responsibility, good character, and general fitness for the position. Note that any felony conviction within the last seven years will disqualify you from consideration for this position. Your continued employment in this position would be contingent upon compliance with Truth in Lending Act/Dodd Frank Loan Originator requirements.

In addition, this position requires National Mortgage Licensing System and Registry (NMLS) registration under the SAFE Act of 2008. As such, upon active employment with JPMorgan Chase, you will be required to either register on NMLS, or to update your existing registration as necessary to grant access to and reflect your employment with JPMorgan Chase. Your continued employment in this position with JPMorgan Chase is contingent upon compliance with the SAFE Act, including successful registration immediately after your start date, and timely completion of annual renewal and required updates thereafter.

Any information obtained during the registration, update, and renewal processes or through NMLS notifications may impact your employment with the firm. Any of the completed information you provide during the Chase on-line application process may be transferred, on your behalf, to NMLS by JPMorgan Chase. Please carefully review the information you provide to Chase for accuracy and consistency and with any current NMLS record, if applicable, before submitting. Further information about NMLS and registration requirements of registration can be found at:

B. Financial Center Manager - Thousand Oaks/Eastshore Financial Centers (2)

Bank of America

Thousand Oaks/Fairfield, CA

Shift: 1st shift

Hours Per Week: 40

Job Description:

At Bank of America, we handle the finances of over 67 million client relationships every day, including helping them save, borrow and invest for today and for their future. We stand by our clients each and every day giving them the power to realize their personal financial goals and help make their financial lives better. If you join our team, we'll count on you to care for, advise and guide our clients when they need us most – whether they're just starting out, buying a home, building a family or planning for retirement.

We're looking for the next generation of Financial Center Managers - those with a passion for growing a long-term career, building relationships and working with a team of client professionals in one of over 4,000 locations nationwide. The Financial Center Manager role is meant for those looking to make a real impact and build a career in financial services. The role is ideal for those with a passion for leading a team, operating as a business owner, fostering a team environment and driving a client-centric culture to make clients' financial lives better. As a Financial Center Manager, you'll develop your financial center team to provide an exceptional client experience, understand the needs of our clients, and ensure clients are introduced to and provided with the most appropriate solution to improve their financial lives.

From day one, you'll receive training from our award-winning Academy at Bank of America, including hands-on practice, personalized coaching and dedicated support throughout your on-boarding experience. With demonstrated success, you'll have the opportunity to advance into roles as a Financial Center Academy Manager, Consumer Banking Market Leader, Consumer Banking and Merrill Edge Market Leader Manager or Performance Manager – with unlimited opportunity to grow throughout the company. The Academy will support you with dedicated programs, tools and resources throughout your career journey.

We'll help you:

- Build a successful career at Bank of America through world-class training and on-boarding programs that set you up for success.
- Grow in your current role through one-on-one coaching from Academy managers who are invested in your success and training programs that help you excel, build new skills or take on additional responsibility.
- Continuously learn and advance your career goals through intentional career paths to the next best role.
- Use resources and innovative technologies to optimize the client experience.
- Gain in-depth knowledge of clients' financial life priorities and connect them to Bank of America solutions that meet their financial goals.
- Lead a team and operate as a business owner by observing and coaching team and individual performance to collectively meet goals, establishing action plans as applicable.
- Attract and retain talent by personally investing in talent through interviewing and hiring financial center employees.
- Understand solutions we provide and build relationships with teammates and specialists to assist clients with financial needs.
- Adhere to policies and procedures through education of regulatory policies, employee and client safety procedures and service delivery guidelines.
- Ensure day-to-day activities comply with standards by observing and coaching teammates in customer service, operational procedures, transaction accuracy and client engagement.

As a Financial Center Manager, you can look forward to:

- Ongoing professional development to deepen your skills and optimize your expertise as the industry evolves and changes.
- Resources and dedicated support to help you reach your full potential throughout your career.
- A benefits programs designed to meet the diverse needs of our employees at every stage of their life and help them plan for tomorrow.

- Progressive workplace practices and initiatives that promote inclusion.

We're a culture that:

- Believes in responsible growth and has a proven dedication to supporting the communities we serve.
- Provides continuous training and developmental opportunities to help people achieve their goals, whatever their background or experience.
- Believes diversity makes us stronger, so we can reflect, connect to and meet the diverse needs of our clients and customers around the world.
- Is committed to advancing our tools, technology, and ways of working. We always put our clients first to meet their evolving needs.

Required skills:

- Is an enthusiastic, highly motivated self-starter with a strong work ethic and intense focus on results, acting in the best interest of the client.
- Collaborates effectively to get things done, building and nurturing strong relationships.
- Displays passion, commitment and drive to deliver an experience that improves our clients' financial lives.
- Has 3+ years' of demonstrated experience building, leading, managing and coaching a team.
- Is confident in identifying solutions for clients based on their needs and can resolve problems independently or bring in others as needed.
- Communicates effectively and confidently, and is comfortable engaging all clients.
- Has the ability to learn and adapt to new information and technology platforms.
- Applies strong critical thinking and problem-solving skills to meet clients' needs.
- Will follow established processes and guidelines in daily activities to do what is right for clients and the bank, adhering to all applicable laws and regulations.
- Efficiently manages your time and capacity.
- Can manage complexity, prioritize tasks, delegate and execute in a fast-paced environment.
- Can interpret performance results, find opportunities to drive success and hold others accountable to results.
- Can be flexible to work weekends and/or extended hours as needed.

Desired skills:

- Experience in financial services and knowledge of financial services industry, products and solutions.
- Experience in mortgage, retail or hospitality.
- Experience working in an environment with individual and team goals where goals were routinely met or exceeded.
- Bilingual skills.

C. Small Business Consultant - Seven Trees Financial Center

Bank of America

San Jose, CA

Shift: 1st shift

Hours Per Week: 40

Job Description:

At Bank of America, we're guided by a common purpose to help make financial lives better by connecting clients and communities to the resources they need to be successful. Make a difference where it counts by joining our industry-leading Small Business Banking team at Bank of America and Merrill Lynch. We're looking for people with a passion for uncovering the needs of small business clients, including their personal banking needs, by using our extensive suite of products and tools.

As part of the Bank of America team, small business consultants (SBCs) have access to industry-leading products and services, award-winning platforms and client education – all designed to meet the unique life priorities of our clients. SBCs partner closely with financial center employees as part of one team that delivers exceptional client care. Your role will be to acquire and deepen small business relationships through face-to-face meetings. You'll actively connect with our clients through outbound telephone calls and execute consistent follow-up routines to meet their needs. The small business consultant role is the first step to a rewarding and successful career. At this stage you'll start building the relationships that can shape your career, and be exposed to the products, platforms and tools needed to serve clients. Our comprehensive education program will help you get the necessary training and guidance along a defined path to help become the consultant you want to be.

Full-time

Job Description

Important Note:

During the application process, ensure your contact information (email and phone number) is up to date and upload your current resume when submitting your application for consideration. To participate in some selection activities you will need to respond to an invitation. The invitation can be sent by both email and text message. In order to receive text message invitations, your profile must include a mobile phone number designated as "Personal Cell" or "Cellular" in the contact information of your application.

At Wells Fargo, we want to satisfy our customers' financial needs and help them succeed financially. We're looking for talented people who will put our customers at the center of everything we do. Join our diverse and inclusive team where you'll feel valued and inspired to contribute your unique skills and experience.

Help us build a better Wells Fargo. It all begins with outstanding talent. It all begins with you.

Wealth and Investment Management (WIM) businesses build enduring client relationships through sound, thoughtful and objective advice. We help our clients by developing individualized plans for everything from retirement goals to business succession planning, to family legacy intentions. Services include comprehensive planning and advice, investment management, brokerage, private banking, estate planning strategies, trust, and both individual and institutional retirement.

The Associate Financial Advisor (AFA) participates in the Wells Fargo Advisors financial advisor training program on a full-time basis and will be partnered with a Senior Financial Advisor. Qualified candidates will enter a comprehensive development and apprenticeship period offering a structured and supportive program designed to reward individual and team contribution while meeting personal, professional and organizational client service and financial goals. The Associate Financial Advisor will be fully trained and supported with the tools, resources, and coaching to serve as an apprentice to a Senior Financial Advisor while providing clients with financial advice consistent with client goals and risk tolerance. The AFA will be tasked to meet with clients, collect financial information, assess investment profile and evaluate client financial needs while providing enhanced service to deepen the relationship. The AFA will work to retain and increase existing client accounts (through developing financial plans and other needs-based solutions) and cultivate new clients over time. The AFA will gain more responsibility as experience increases and will transition from client service to relationship management and ownership. This person must complete online training, participate in classroom training, pass Compliance exams on products and suitability, and complete the activity requirements of the program.

Required Qualifications:

- 1+ year of experience of one or more of the following; customer service, sales, or relationship building; or 6+ months of experience in financial services; or BS/BA degree or higher; or 3+ years of military experience

Desired Qualifications:

- Ability to work effectively in a team environment and across all organizational levels; where flexibility, collaboration, and adaptability are important
- Excellent verbal, written, and interpersonal communication skills
- FINRA registration including Series 7 and 66 (or FINRA recognized equivalents)
- Financial services experience
- Client services experience
- 2+ years of client or sales services experience
- A BS/BA degree or higher
- Established network in the local market

Job Expectations:

- Registration for FINRA Series 7 and Series 66 (or 63 & 65) or FINRA recognized equivalents must be obtained to remain in this position.
- Obtaining and/or maintaining appropriate Financial Industry Regulatory Authority (FINRA) license(s) is required for ongoing employment in this position. In addition to state registration, specific product licenses or SAFE licensing may apply. Wells Fargo will initiate financial and criminal background review process at the time of offer acceptance.

- For specific FINRA qualification exams obtained after 9/30/2018, the Securities Industry Essentials (SIE) exam co-requisite may also be required

B. Junior Private Mortgage Banker

Wells Fargo

1810 Gateway Drive Suite 150 - San Mateo, CA

Full-time

Job Description

Important Note:

During the application process, ensure your contact information (email and phone number) is up to date and upload your current resume when submitting your application for consideration. To participate in some selection activities you will need to respond to an invitation. The invitation can be sent by both email and text message. In order to receive text message invitations, your profile must include a mobile phone number designated as "Personal Cell" or "Cellular" in the contact information of your application.

At Wells Fargo, we want to satisfy our customers' financial needs and help them succeed financially. We're looking for talented people who will put our customers at the center of everything we do. Join our diverse and inclusive team where you'll feel valued and inspired to contribute your unique skills and experience.

Help us build a better Wells Fargo. It all begins with outstanding talent. It all begins with you.

Consumer Banking is an industry leader in supporting homeowners and consumers in addition to operating one of the most extensive banking franchises in the country. We serve mass market, affluent, and small business customers; as well as provide home and personal lending. Our focus is on delivering an exceptional experience for our customers through financial advice and guidance coupled with providing the products and services that will help them realize their financial hopes and dreams. We've built our team of top professionals by rewarding their accomplishments and ensuring they have what's needed to succeed.

This SAFE position has customer contact and job duties which may include the offering/negotiating of terms and/or taking an application for a dwelling secured transaction. As such, this position requires compliance with the S.A.F.E. Mortgage Licensing Act of 2008 and all related regulations. Ongoing employment is contingent upon meeting all such requirements, including acceptable background investigation results. Individuals in a SAFE position also must meet the Loan Originator requirements under Regulation Z (LO) outlined in the job expectations below.

We have an immediate opening for a CA Private Mortgage Banker Junior (SAFE). This individual is responsible for working under the guidance of a senior CA Private Mortgage Banker (SAFE) to produce high quality jumbo residential mortgage loans that meet Wells Fargo Home Mortgage guidelines by building relationships focused on affluent borrowers with realtors, builders, financial professionals, bank stores, past customers, and other non-traditional sources. Strong sales and organizational skills are essential. Bi-lingual job seekers are encouraged to apply.

Additional duties include:

- Develop knowledge of company products, policies and procedures, and underwriting requirements
- Understand real estate appraisals, title reports, and real estate transactions
- Inform prospective and existing customers of WFHM programs, rates, policies, underwriting requirements, and loan procedures
- Analyze detailed financial and credit data, matching customer needs with an appropriate loan program and level of risk
- Receive customer applications, quote the rate and points, and complete follow-up activities with the registration lock-in
- Develop and maintains a high degree of visibility for WFHM in the marketplace
- Perform miscellaneous duties as needed and required

Required Qualifications:

- 1+ year of sales experience

Desired Qualifications:

- Basic Microsoft Office skills
- Excellent verbal, written, and interpersonal communication skills
- Mortgage industry experience

- Bilingual speaking proficiency in Spanish/English
- Customer service experience
- A BS/BA degree or higher

Job Expectations:

- This position requires SAFE registration at the time of employment. Wells Fargo will initiate the SAFE registration process immediately after your employment start date. The Nationwide Mortgage Licensing System (NMLS) web site (<http://fedregistry.nationwidelicensingsystem.org>) provides the MU4R questions and registration required for employment in this position.
- Individuals in Loan Originator (LO) positions must meet the Consumer Financial Protection Bureau qualification requirements and comply with related Wells Fargo policies. The LO qualification requirements include meeting applicable financial responsibility, character, general financial fitness and criminal background standards. A current credit report will be used to assess your financial responsibility and credit fitness, however, a credit score is not included as part of the evaluation. Successful candidates must also meet ongoing regulatory requirements including additional screening, if necessary.
- This position requires compliance with all mortgage regulatory requirements and Wells Fargo's compliance policies related to these requirements including acceptable background check investigation results. Successful candidates must also meet ongoing regulatory requirements including additional screening and required reporting of certain incidents.
- Ability to lift 20+ pounds
- Reliable transportation
- Ability to work nights, weekends, and/or holidays as needed or scheduled

C. Software Sr Engineer (3)

Wells Fargo

Concord/Fremont/San Leandro, CA

Full-time

Job Description

Important Note:

During the application process, ensure your contact information (email and phone number) is up to date and upload your current resume when submitting your application for consideration. To participate in some selection activities you will need to respond to an invitation. The invitation can be sent by both email and text message. In order to receive text message invitations, your profile must include a mobile phone number designated as "Personal Cell" or "Cellular" in the contact information of your application.

At Wells Fargo, we want to satisfy our customers' financial needs and help them succeed financially. We're looking for talented people who will put our customers at the center of everything we do. Join our diverse and inclusive team where you'll feel valued and inspired to contribute your unique skills and experience.

Help us build a better Wells Fargo. It all begins with outstanding talent. It all begins with you.

Wells Fargo Technology is a team of more than 40,000 information technology and security professionals who help keep Wells Fargo at the forefront of America's diversified financial services companies. Employees execute an engineering-led IT strategy to deliver stable, secure, scalable and innovative services that provide Wells Fargo global customers 'round-the-clock' banking access through in-store, online, ATM, and other channels. Wells Fargo Technology plays a critical role in the company's customer and employee experience, business and risk management transformation, and growth agenda.

Software Sr. Engineers are highly skilled software engineers in Wells Fargo's Digital Payments team, who develop innovative best-in-industry micro-services utilized by internal and external clients providing financial services to millions of customers. Digital Payments Software Engineers are part of an agile team, partnering with groups worldwide, to solve challenging and interesting technical problems.

This position is part of Digital group under Consumer and Small Business Banking Technology that manages Wells Fargo Retail Online Banking serving 40+ million customers 24/7/365 days. Our Mission is to support our company's Vision & Values by delivering; maintaining and supporting high quality software solutions that provide our customers with outstanding digital experiences helping them manage their financial needs.

In this position, Software Sr. Engineer must be specialized in building highly scalable, distributed, event-driven, fault-tolerant, API-based enterprise applications in a scaled agile ecosystem. Software Sr. Engineer must have Core Payment Domain experience and built Payment APIs with idempotency to ensure payments get executed only once. Engineer must have implemented payment products like Zelle that involve integration with Early Warning System(EWS) APIs. Candidate must have knowledge of NACHA/ACH for payments and experience with money movement across financial institutions. Candidate will apply Wells Fargo Digital Banking coding practices to test-drive the creation of micro-services with Java, J2EE, JUnit, Spring, RESTful services. The engineer participates in the growth of a framework that has to deliver 20+ million daily user sessions to very large set of devices used by our diverse customer base, from the oldest web browser to the newest smart watch. Knowledge and usage of A/B testing as part of rolling out features.

The candidates responsibilities will be: Working closely with application teams, infrastructure and middleware teams to maintain applications that are secure and highly scalable/available. Plan, execute and maintain road maps in alignment with Enterprise Security standards and in accordance to established business SLAs. Plans, performs, and acts as the escalation point for the most complex platform designs, coding, and testing. Acts as expert technical resource to programming staff in the program development, testing, and implementation process.

The Software Sr. Engineers influences the strategy across multiple channels. Key interactions in the role are working with technology partners in supporting and on-boarding new applications along with Business users to define the long term goal. Working closely with product managers to understand requirements and work through the “what’s and the how’s” to implement features for customers of the digital channel. Other responsibilities include working with architecture and development teams to evaluate technical designs and associated trade-offs.

As a Team lead in a senior role, you are expected to achieve success by leading yourself, your team, and the business. Specifically you will: Lead your team with integrity and create an environment where your team members feel included, valued, and supported to do work that energizes them.

The engineer will contribute new ideas to improve processes, practices and culture. Digital Payment engineers are given the opportunity to innovate and experiment with new technology, encouraged to participate in contests & hackathons along with presenting the ideas to other organizations.

This position can be based at the Wells Fargo site location in Fremont, San Leandro or Concord CA.

This position is NOT ELIGIBLE for relocation assistance. Prospective candidates should reside in and/or around the target site location or be able to commute to the site for employment.

This is a full time opportunity with a competitive compensation package, a comprehensive benefits package including a generous PTO program and many other benefits. For additional benefit information visit <https://www.wellsfargo.com/about/careers/benefits/>.

Required Qualifications:

- 7+ years of software engineering experience
- A BS/BA degree or higher
- 2+ years of MQ Series Messaging experience
- 2+ years of MongoDB experience
- 7 + years of Java Web Services experience
- 1+ years of experience in Hadoop ecosystem tools for real-time batch data ingestion, processing and provisioning such as Apache Flume, Apache Kafka, Apache Sqoop, Apache Flink, Apache Spark or Apache Storm
- 2+ years of experience managing off property Application Programming Interface (API) orchestration and integration
- 2+ years of experience in building integrations with Google Analytics and Tealium Tag Management platforms
- 2+ years of experience in building integrations with Oracle Maxymiser Web Optimization platform
- 3+ years of experience with Application performance, monitoring and optimization using Blazemeter, JMeter, Splunk and AppDynamics
- 7+ years of JavaEE experience
- 7+ years of Java experience

Desired Qualifications:

Full-time

Overview:

We have an immediate need for an interim controller to backfill our current U.S. Controller who is being reassigned to support a 2-year ERP implementation project. If you have a passion for financial accuracy/reporting and thrive on internal collaboration to get the job done right in an accountable culture, please consider applying. This role is responsible for the coordination and leadership of an experienced team who are celebrated for their high degree of accuracy, compliance and competence in support of the smooth operation of our U.S. and Latin Americas businesses. You will be very hands-on and direct all U.S. and Latin America business segment financial accounting activities and functions while ensuring the accuracy, completeness and timeliness of monthly, quarterly and annual financial close and reporting. In addition you will support and collaborate with the FP&A and Corporate Accounting team. More specifically, you will establish priorities and monitor general ledger accounting, payroll, accounts receivable and accounts payable functions. None of this is possible without ensuring compliance and adherence to the company's procedures/processes/controls, financial accounting standards, U.S. GAAP, SEC, and applicable governmental laws and regulations.

Responsibilities

Key Functions:

You'll be Accountable For Financial controllership and stewardship of all U.S. and Latin America operations including general ledger accounting, payroll, accounts receivable and accounts payable. Lead the accounting team and participates in the preparation, review, design, planning and monitoring of the financial and closing processes to ensure accurate, timely and compliant reporting of all financial results in accordance with Company Standards, U.S. GAAP and all applicable legal and regulatory requirements. Self-perform critical accounting functions for Revenue, Intercompany, Cost of Goods Sold, and Inventory accounting and analysis. Works closely with Supply Chain to evaluate, implement, maintain and monitor accounting systems, policies and procedures for existing and new Supply Chain partners. Oversee and participate in preparation for and compliance with monthly, quarterly and annual audits. Prepare and oversee routine and ad-hoc data analysis and schedules. Provide analyses and comments on cost/profit drivers, balance sheet variances and potential risks. Compile and maintain fiscal records and provide financial reports in accordance with U.S. GAAP and SEC requirements. Take a proactive role in troubleshooting obstacles with respect to accurate and timely reporting. Support the Company's quarterly and annual SEC filings. Ensuring Sarbanes-Oxley process compliance in areas of responsibility.

Qualifications

What You'll Bring to the Role:

- 8+ years progressive, successful public company accounting experience
- 2+ years U.S. controllership experience within a manufacturing company.
- International experience, preferred.
- Recent inventory experience required.
- Bachelor's degree in Accounting CPA (current or inactive), ideal
- Extensive knowledge of all areas of general accounting and financial ERP systems including: general ledger accounting, inventory, cost of goods sold, intercompany, accounts receivable, accounts payable, payroll, intercompany transactions, audit, financial analysis, and Sarbanes-Oxley risk and controls Expert knowledge of U.S. GAAP within the scope of role
- Broad working knowledge of SEC reporting requirements, SOX regulations
- Advanced knowledge of U.S. payroll rules, including all rules for tax withholdings and W-2 reporting.
- Accountable for timely and accurate preparation and oversight of both self-prepared and team deliverables while balancing multiple demands, competing priorities and deadlines
- Ability to solve challenges of resource allocation, conflict and provide team guidance to accomplish objectives

Our "Why"

At WD-40 Company we believe that purpose-driven, passionate people guided by our values create amazing outcomes. Our "why" is refreshingly simple - we exist to create positive lasting memories in everything we do. We solve problems. We make things work smoothly. We create opportunities. How we achieve our "why" is by cultivating a tribal culture through learning, teaching and living our values. Since 1953, our formulation remains a secret. It is no secret that our passion for our people, culture, and brands is what distinguishes us.

- Evaluate the continued effectiveness of implemented protection measures within the authorization boundaries

Required Skills:

- Proven experience in leading a cyber-security team while managing the Risk Management Framework
- Ability to translate cyber-security related policies and guidance into system requirements
- Familiarity with cyber-security assessment and authorization processes such as the Risk Management Framework
- Understanding of common vulnerabilities and application of compensating controls or mitigation strategies
- Familiarity with cyber-security policy and processes, architectures, testing and evaluation procedures
- Articulate complicated security concepts in cross-functional planning, coordination and task execution across the spectrum of systems engineering and integration activities
- Ability to sort through complex issues, prioritize them accordingly, and elevate to management as necessary
- Strong written and verbal communications skills
- Understanding of risk management principles and their application within an information system
- Familiarity with key management and cryptographic concept
- In accordance with DoD 8570.01M, the selected individual must meet the requirements of an IAM Level III as a condition of employment (CISM, CISSP or Associate, GSLC)

Preferred Skills:

- Effective interpersonal and team-building skills, to engage at both the engineer and management levels to build confidence and collaboration between team members
- Understanding and experience in the acquisition life cycle for information systems
- Experience in security control evaluation, testing, and assessment in complex system environments
- Familiarity with security tools for implementing and assessing security compliance (e.g. SCAP, STIGS, ACAS)
- Experience with Program Protection and generation of Security Classification Guides

Required Experience:

- 7 years of work experience in Information Assurance/Cybersecurity
- Bachelor's degree in Cybersecurity, Engineering, or a related scientific or technical discipline
- Must have an active TS/SCI clearance to be considered for this position
- Demonstrated experience applying security risk assessment methodology to system development, including threat model development, vulnerability assessments, and resulting security risk analysis
- Advising government program managers on security testing requirements, methodologies, and processes
- Oversight and management of assessment and authorization processes for information systems such as the NIST Risk Management Framework (RMF), DIACAP, JSIG, DODI 8510.01)

Preferred Experience:

- 10+ years of work experience in Information Assurance/Cybersecurity
- Master's Degree in Cybersecurity, Engineering, or a related scientific or technical discipline
- Previous experience supporting military satellite communications programs such as Milstar, AEHF, GPS, SMART-T
- Key developer of system security plans, Security Assessment Plans/Reports, Risk Assessment Plan/Report, Plan of Action and Milestones (POA&M), and associated cybersecurity artifacts
- Experience managing training plans to ensure ISSO's and other system security personnel have received and maintain the necessary technical and security training to carry out their duties

B. WGS Lead Systems Integration

LinQuest Corporation

El Segundo, CA

Full-time

LinQuest is seeking a System Integration Lead to join our team in El Segundo, CA.

You will work on the MILSATCOM Systems Engineering, Integration and Test (MSEIT) contract in support of the US Air Force Space and Missile Systems Center (SMC), Production Corps, Wideband Global SATCOM Program Office (SMC/PCGW). This effort includes providing acquisition, systems engineering, and Launch Systems Integration (LSI) support.

The position is full time, and requires an active Secret clearance. You will reside at the MSEIT offices in El Segundo, CA, but in close proximity to the Government Customer.

Responsibilities:

- Monitor, evaluate, and provide comments and recommendations to the WGS Customer at WGS and SATCOM Interface
 - Control Working Groups, WGS and SATCOM Risk Boards, engineering review boards, and design reviews
 - Actively coordinate with WGS stakeholders including Aerospace, the WGS Prime Contractor, SMC Launch Enterprise, and MSEIT functional areas (e.g.; System Safety, CM/DM and Risk)
 - Monitor, evaluate, and provide comments and recommendations to the WGS Customer at the SMC/ECL Senior Management Review and Current Launch Schedule Review Board
 - Monitor, evaluate progress, and provide comments and recommendations to the WGS Customer at a Launch Vehicle Study and Early Integration Study
 - Support acquisition planning, including development and evaluation of requests for proposal and technical evaluation of contractor proposal documents
 - Review, evaluate, and provide comments and recommendations to the WGS Customer for program documentation and plans (e.g.; CDRLs)
 - Perform long-range Launch SI planning, including maintaining management tools e.g.; LSI Plan
 - Maintain active dialog with Customer; recommend issues to work; and work them
 - Maintain active dialog with Customer; recommend issues to work; and work them
 - Maintain the WGS Livelink and DI2E file structures
 - Develop tasker responses
- Required Skills:
- Bachelor's degree in engineering, mathematics, physics, computer science, or equivalent technical discipline
 - Ability to coordinate with the Government and industry stakeholders
 - Ability to clearly articulate ideas, recommendations, and options
 - Strong interpersonal and collaboration skills, and proactivity
 - Independent problem solver, comfortable in a fast paced environment and be able to quickly adapt to emerging requirements and changing priorities
 - Working knowledge of Microsoft tools (Excel, Outlook, PowerPoint, Project and Word)
 - An active Secret clearance is required to be considered for this position
- Preferred Skills:
- Master's degree in engineering, mathematics, physics, computer science, or equivalent technical discipline
 - Systems engineering certifications, such as CSEP, ESEP, OCSMP, PMI, PMP
- Required Experience:
- At least 10 years of experience with launch readiness assessments, launch campaign planning, launch rehearsals, and day of launch
 - At least 10 years of experience in Government acquisition or systems engineering processes
 - At least 10 years of experience working with military or DoD civilian clients and managing professional relationships
- Preferred Experience:
- Wideband Global SATCOM program experience

Clearance required: Secret

C. GPS Enterprise Scheduler

LinQuest

El Segundo, CA

Full-time

LinQuest is seeking a GPS Enterprise Scheduler to join our team in El Segundo, CA.

Enterprise integration scheduling for the GPS program as part of the GPS Systems Engineering and Integration (SE&I) team. Position interfaces include GPS client, supporting contractors, external stakeholder organizations, and SE&I teammates

Responsibilities:

- Development and maintenance of the Enterprise Master Schedule (EMS) - a product linking multiple schedule products and a database of Giver/Receiver dependencies
- Identification, documentation and management of key schedule dependencies between GPS segments, development contractors, and external stakeholders
- Analysis of primary/secondary critical paths and margin
- Creation of automated reporting templates and routine generation of reports using third-party tools and custom scripts

Department of Defense Secret security clearance is required within a reasonable period of time. Applicants selected will be subject to a U.S. Government security investigation and must meet eligibility requirements for access to classified information. Due to the nature of work performed within our facilities, U.S. citizenship is required.

REPRESENTATIVE DUTIES AND TASKS:

- Acts as the subject matter expert (SME) for the Windows and Linux Total Ship Computing environment and Network infrastructure on-board Navy ships
- Installs, configures, and maintains software onboard Littoral Combat Ships
- The work entails installing and configuring Windows/Linux servers, setting up and maintaining DNS/Exchange/Active Directory, supporting and maintaining virtual environments, and troubleshooting problems with deployed systems
- Manage daily break/fix scenarios, updates, backups and other problems that arise
- Ideal candidate should have strong troubleshooting skills and be able to work independently
- Able to troubleshoot non software issues such as hardware/network/encryption issues
- Directly interfaces with Navy crews and representatives as well as other contractors (primes or subs depending on the situation)
- Conducts functional, environmental, operational, and/or performance tests on hardware, software, and systems
- Isolates and documents issues and defects
- Follows direction and is accountable for the successful completion of tasks, thereby making a significant contribution to the team
- Receives direction from the assigned Hull Lead engineer on technical objectives of assignments
- Demonstrates understanding of commitments and interdependencies
- Ensures process/policy compliance
- Supports continuous improvement initiatives
- Frequent contact with multiple work groups
- Usually participates with other members of the team
- Shows initiative on assignments, exercises independent judgment and professionally executes projects with little direction

REQUIRED SKILLS:

- Solid understanding of Microsoft Windows Desktop (Windows 7, 10) and Server (2008, 2016) technologies including experience with traditional software delivery and application installation processes and configurations
- Solid understanding of Linux server technologies including experience with traditional software delivery and application installation processes and configurations
- Proficient with virtualization software such as vSphere and ESXi
- Experience integrating software on a common operating system
- Experience with group policies
- DNS/Exchange/Active Directory Administration Experience

ADDITIONAL APPLICABLE SKILLS:

- Experience with Scanning/Vulnerability Management tools (VMS, ACAS, Nessus)
- Experience with Data Protection Software such as Acronis or Veritas
- Ability to perform network troubleshooting (Certificates, 802.1x, multicast, TCP/IP etc)
- Experience with scripting and automation technologies, specifically PowerShell and BASH
- Experience with security software such as McAfee's Host Based Security System
- Operating system certifications (Windows Server, RedHat Linux)
- Security + certification, or ability to obtain Security + certification
- Linux system administration experience
- Experience with systems administration software such as Splunk and Landesk
- Experienced with designing, configuring, and securing virtual machines
- Experience with implementing basic Windows mail servers.
- Knowledge of Exchange 2010 & 2016.
- Microsoft Deployment Toolkit knowledge
- Troubleshooting skills with Active Directory Replication
- Storage Area Network (SAN) administration
- Data Backup Systems Administrator
- Experience configuring SNMP on Windows servers
- Experience supporting end-users

- Experience in configuring and troubleshooting Alcatel and Cisco switches/routers/Firewalls
- Strong problem solving and troubleshooting skills

****Bachelor's degree in systems engineering, a related specialized area or field is required (or equivalent experience) plus a minimum of 2 years of relevant experience; or Master's degree. Agile experience preferred.**

PREFERRED DEGREE TYPES AND EXPERIENCE:

- IAT Level II/II Certification
- Other applicable certifications (e.g. Windows/Linux Certifications, CompTIA Security+, Network+, CCNA, MCSA, MCSE, Linux+)
- Bachelor's degree in systems engineering, computer science, software engineering, electrical engineering, information technology or a related specialized area or field
- Experience working on the LCS class of ships

KNOWLEDGE SKILLS AND ABILITIES:

- Fully proficient use and understanding of test engineering concepts, principles, and theories
- Contributes to the development of new theories and methods
- Fully proficient awareness of business objective and Engineering's role in achieving them
- Fully proficient in Microsoft Office applications
- Fully proficient written and verbal communications skills
- Ability to think creatively
- Good at multi-tasking
- Skilled in communicating issues, impacts, and corrective actions
- Fully proficient ability to clearly report information relevant to sound test engineering
- Team player who thrives in collaborative environments and revels in team success, meeting and exceeding personal and team commitments
- Fully proficient ability to promote concepts and ideas to a diverse audience

B. LCS Gun Mission Module (GMM) Technician

General Dynamics Mission Systems

National City, CA

Full-time

Job Description

Basic Qualifications:

Associate's degree in related discipline or equivalent is required plus a minimum of 1 year of relevant experience.

CLEARANCE REQUIREMENTS:

Department of Defense Secret security clearance is required at time of hire. Applicants selected will be subject to a U.S. Government security investigation and must meet eligibility requirements for access to classified information. Due to the nature of work performed within our facilities, U.S. citizenship is required.

Responsibilities for this Position:

General Dynamics Mission Systems has an immediate opening for an LCS Gun Mission Module (GMM) Technician at San Diego Naval Base. This position provides an opportunity to further advance the cutting-edge technology that supports some of our nation's core defense/intelligence services and systems. General Dynamics Mission Systems employees work closely with esteemed customers to develop solutions that allow them to carry out high-stakes national security missions.

REPRESENTATIVE DUTIES AND TASKS:

The LCS DEPS GMM Technician will engage in Maintenance, Mission Module Movements/Embarks and Debarks, Pre-embark Staging, Maintenance Planning, Fly-Away/Distance Support and Logistic Engineering Support. The candidate will perform a variety of duties in Corrective Maintenance, Emergent Repair, and Preventative Maintenance involving GDMS Mission Module support of Littoral Combat Ship (LCS).

- Assists in the development, implementation, installs, tests, modifies and/or operates complex equipment and systems

- Participates on the engineering work team and supports other team members in experimental design, materials, equipment setup/maintenance and related issues
- Installs and removes MM equipment on LCS ships
- Performs a variety of equipment/process operations involving an application or technical skills in a specific area (electrical, software, manufacturing, optical, etc.)
- Construct, modify, debug, test and adjust a variety of tools and equipment given appropriate drawings, parts and instructions
- Implements basic practical solutions for process improvement
- Conducts and documents experiments under guidance of senior technician
- Constructs basis tooling and fixtures to accomplish unique tasks
- Works under general supervision

The candidate will be based in San Diego, CA and will support the LCS platforms, including travel to other domestic ports and OCONUS ports as appropriate. The selected candidate will be expected to travel 20% of the time supporting Littoral Combat Ships (LCS-class ships) and will work within the parameters and rules common to U.S. Naval vessels.

KNOWLEDGE SKILLS AND ABILITIES:

This position will require the ability to work from tech manuals, vendor documentation, schematics, and engineering drawing to supports the ship's maintenance efforts. The LCS DEPS Mission Module Maintenance Technician will be expected to have proficiency with test equipment operations, pin insertion/extraction methods, fiber repair, cable repair/rework, connector repair/rework, and basic soldering. Additional duties may be assigned, including but not limited to logistics, material, and safety responsibilities as it relates to the Mission Modules.

The LCS DEPS Mission Module Maintenance Technician will be expected to become completely familiar with their system, with the goal of becoming the Subject Matter Expert (SME).

- Experience operating and maintaining Navy weapons systems such as Mk 44/46 30mm Guns, MK 110 57mm Guns, Mk 45 5"/54; Close-in Weapons System (CIWS); Mk 34 Gun Weapon System (GWS) on US Navy/Coast Guard Vessels, and USMC/Army vehicles is desired.
- Candidate will be required to perform physically demanding work, to include working aloft, in tight, restricted spaces onboard LCS Platforms, climbing scaffolding, ladders and standing for long periods of time onboard an LCS ship or pier and be able to lift 50 lbs. or more.
- Must be able to pass forklift operators physical and proficiency tests
- The candidate may be responsible for working with a team of technicians, engineers, and government staff as appropriate
- Experience with Navy maintenance, to include Ships Maintenance and Material Management (3M), Preventive Maintenance and Corrective Maintenance.
- This individual must have strong oral and written communication skills and be proficient with typical PC applications to include Word, Project, Excel and Access
- Professional etiquette and ability to operate effectively in a distributed team environment and effectively communicate customer initiatives, strategy and mission needs

PREFERRED DEGREE TYPES AND EXPERIENCE:

- Formally trained, operated and maintained Navy's Surface Warfare (SUW), Mine Countermeasure (MCM) and systems and inter-workings of the LCS Class MM program
- Experience with 30mm guns on the LCS, LPD-17 Class, USMC Advanced Amphibious Assault Vehicle (AAAV) or similar chain guns is highly desired
- Experience in Heating, Ventilation and Air Conditioning (HVAC)
- Auxiliary supporting equipment, such as motor controllers, fuel conditioning, and damage control equipment
- Licensed Forklift Operator
- Commercial Driver's License (CDL)
- Familiar with U.S. Naval protocol and the ability to work directly with interfaces in uniform and with engineers in other companies
- Superior organizational and time management skills
- Familiar with U.S. Navy Work Authorization Forms (WAF) and Tag-Out Programs

General Dynamics Mission Systems (GDMS) engineers a diverse portfolio of high technology solutions, products and services that enable customers to successfully execute missions across all domains of operation. With a global team of 12,000+ top professionals, we partner with the best in industry to expand the bounds of innovation in the defense and scientific arenas. Given

the nature of our work and who we are, we value trust, honesty, alignment and transparency. We offer highly competitive benefits and pride ourselves in being a great place to work with a shared sense of purpose. You will also enjoy a flexible work environment where contributions are recognized and rewarded. If who we are and what we do resonates with you, we invite you to join our high performance team!

Director TIMSA/Operations/Logistics
General Dynamics NASSCO
San Diego, CA
Shift: 1st
Security Clearance: No Clearance
Full time

Summary:

The purpose of the Director TIMSA Off-Site Operations/Logistics is to supervise the overall operations, financial performance and personnel that operate at TIMSA to assure the on-time and accurate delivery of material fabricated, kitted and assembled to support shipyard operations.

The Director TIMSA Off-Site Operations/Logistics Reports To The Vice President Of Supply Chain Management And Has Broad Latitude In Overseeing The Following Functions:

IMT and TIMSA - NASSCO's Mexico operations including:

- TIMSA I facility for metal outfit fabrication and assembly
- TIMSA II facility for sheet metal fabrication
- TIMSA II facility for pipe spool fabrication
- IMT and TIMSA Engineering, Procurement, Warehousing and Material Analyst functions
- Logistics in support of material delivery to NASSCO
- Oversees Material Analyst functions in support of IMT and TIMSA to be performed at NASSCO
- Supports IMT and TIMSA outside sales

Working relationships include operations leadership, ships' managers, material support technicians, receiving inspectors, material control analysts, auditors, and regulatory body representatives, government surveyors, purchasing representatives, estimators and contracts administrators. Position executes daily responsibilities under its own direction and authority. Position is based at NASSCO, but requires travel to TIMSA operations in Mexicali, Mexico.

Essential Functions And Duties:

- Overall responsibility for the IMT and TIMSA operations in Mexicali, Mexico including ensuring adherence to schedule requirements, while providing high quality products and meeting financial performance goals.
- Overseeing the logistics chain of delivering material and large equipment assemblies from TIMSA to San Diego at the lowest possible cost, maintaining and expanding the reliability of the delivery process.
- Utilization of subcontractors to support overall fabrication targets and schedule requirements.
- Maintaining inventory records accurately and conducting inventory cycle counts.
- Receiving inspection at TIMSA.

C. Software Engineer (PHP) TargetCW

San Diego, CA
Full-time

Auto req ID: 9671BR

Shift: 1st Shift

Travel Requirements: Full Time Travel

This position does not qualify for relocation.

Fleet Engineer -New Grad Rotational Program:

Solar Turbines is looking for a new college graduate with a Mechanical, Electrical, or Aeronautical Engineering degree. This is a 3-year rotation program for new grads.

The candidate will spend the first year training in San Diego and Texas. The training will focus on a broad exposure to our products and the Customer Service organization. While in San Diego and Texas (the first 8 months of training), the successful candidate will receive both on-line web-based training and classroom training; commissioning and maintenance field assignments at customer sites; controls engineering assignment; and exposure to the Customer Service Response Center and QHSE training, time in engine teardown, build and test and field assignments at customer sites. During the following six months, the candidate will be trained on all aspects of Machinery Management Services and support a Solar Fleet Manager in a U.S. District Office.

After the 14 months of training, the candidate must commit to spending 2 additional years at ONE of our U.S. district offices as a Fleet Engineer. At this time, the selected candidate will be given a company vehicle to travel. Ensure customer expectations are met or exceeded.

This is a hands-on position, which requires heavy travel and overtime, relocation, heavy customer-interface and possible offshore assignments.

This position is responsible for providing technical and administrative support to Fleet Managers in maintaining and managing Machinery Management Agreements between Solar and customers. Facilitates equipment failure investigations and root cause determination with appropriate groups. Compiles and submits engineering reports and analysis to Fleet Managers for review. Fleet Engineer supports FM with alert management, preventative action reports, value tracking, and compilation of monthly reports and submission to customers. He/She will participate in and support onsite condition assessments. Fleet Engineer will also support FM with Service Bulletin compliance and implementation of corrective actions as well as follow up on pending issues defined within issue tracker. He/she must be well versed in both Solar and customer HSSE management systems. Ensure compliance to the HSSE requirements, best practices and provide overviews to Field Service Representatives and other personnel who will be visiting customer site.

U.S. District Office Locations:

- Irvine, CA
- Salt Lake City, UT
- Midland, TX
- Lafayette, LA
- New Orleans, LA
- Houston, TX
- Pittsburgh, PA
- Upper Saddle River, NJ
- Chicago, IL
- Anchorage, AK

Minimum Qualifications:

- Minimum GPA of 3.0 on a 4.0 scale is required.
- Bachelor's degree in Engineering is required.
- Must have obtained or will obtain Bachelor's degree between 2017 and 2020.
- Must be able and willing to travel, relocate, and work overtime.
- High integrity and a high level of self-confidence .
- Ability to handle stress and communicate in a professional manner.

Preferred Qualifications:

Demonstrated sound technical proficiency and knowledge of gas turbine and Turbomachinery equipment and be able to understand, evaluate and analyze complex technical information. He/she must have the ability to communicate effectively with

Key Competencies: integrity, problem solving, conflict management, time management, customer focus, timely decision making, motivating and directing others, drive for results.

B. Field Employee Relations Manager

Allied Universal

San Jose, CA

Full time

This position is responsible for employee relations, employment compliance, unemployment claims, and monitoring of employment status for the employees of that designated area. With a focus on investigations, manager and supervisor training, and compliance. This position will ensure all recruitment processes, practices, compliance, technology, and tools are used in the field to maintain stated region goals pertaining to non-billable overtime (NBOT), Security Officer Turnover, and Account Manager Turnover.

ESSENTIAL JOB DUTIES AND RESPONSIBILITIES: Those duties necessary to meet the minimum requirements of the position. Other duties may be assigned:

- Investigation of, response to, and documentation of employee complaints, including potential legal issues, EEOC charges, and focus groups.
- Monitoring of NBOT; Working with Recruiters in finding proactive solutions in staffing positions.
- Monitoring and assuring compliance in hiring practices, personnel documentation, and other compliance items (e.g. licensing, performance evaluations, LDW report, etc.).
- Training of account managers and supervisors in employee relations, positive employment practices, and avoidance of legal issues.
- Monitoring of employee terminations, assessment of documentation supporting terminations, and responses to the Department of Labor for unemployment claims.
- Participation in employee retention and human capital management activities.
- Coach Managers, HR designees, and others who have HR responsibilities within a district office.
- Oversee employee relations and claims management activities throughout the designated area, assuring that investigations are handled and documented appropriate to negating a lawsuit.
- Support the Regional HR Director and Legal team on sensitive investigations.
- Assure compliance with programs are being appropriately administered regarding licensing, I-9s, leaves of absences, vacations, personnel file maintenance, status changes, performance evaluations, terminations, etc.
- Develop, in conjunction with Branch Manager/ General Manager and HR Director, plans to reduce overtime and turnover

OTHER RESPONSIBILITIES:

- Other duties or responsibilities that may typically be assigned to this position include but are not limited to:
- Assist in development of managers through training on labor law, ER processes, and skills. Help District Managers write development programs for managers with performance issues.
- Improve work environment and employee relations through effective customer service and various measures, including complaint investigation, grievance resolution, focus groups, etc., as appropriate to the situation and the Concern Resolution Policy.
- Ensure that corporate policies are appropriately enforced and implemented.
- Assure that appropriate information is communicated with and to the District Managers and the Regional HR Director.
- Travel regularly throughout designated area to interact with and gain confidence of district support and operations personnel, and to investigate particularly serious allegations.

QUALIFICATIONS:

- To perform this job successfully, the individual must be able to perform each essential duty satisfactorily. The requirements listed below are representative of the knowledge, skills, and/or experience required. Reasonable accommodation may be made to enable individuals with disabilities to perform the essential functions.
- Bachelor's Degree in Human Resources or Business Administration with a minimum of 2 years of HR Generalist experience.
- PHR Certification preferred, but not required.
- Supervisory experience.

- Ability to train and explain to managers the basics in employment law for better understanding and supervisory ability.
- Demonstrated ability to take initiative, successfully handle and prioritize multiple competing assignments and effectively manage deadlines.
- Energetic and focused personality with a demonstrated ability to take initiative, successfully handle and prioritize multiple competing assignments and effectively manage deadlines.
- Must be highly proficient and fully functional in all Microsoft Office applications and able to effectively utilize all available office management technology.
- Professional, articulate and able to use good independent judgment and discretion. Must have proven ability to maintain correspondence, discussions and materials in strictest confidence. Must be able to work overtime as needed.
- Current state driver's license, clean driving record (no points in prior 3 years), minimum level of insurance as required by Company policy, and ability to safely operate a vehicle required.
- Professional, articulate and able to use good independent judgment and discretion.
- Outstanding verbal and written communication skills required. Ability to successfully interact at all levels of the organization, including with clients, while functioning as a team player required.

Mechanical Engineer
VORTEX ENGINEERING
San Diego, CA

JOB SUMMARY:

This is a unique opportunity for an experienced, reliable, and hardworking Mechanical Engineer who is seeking a growth and leadership opportunity to manage the workflow of our expanding high precision metal fabrication, industrial machines, and welding facility in San Diego.

You will report to the President and must be adept at managing project teams of various sizes to bring projects to completion within budget and on schedule and have a stellar record of customer service and satisfaction. We need someone to manage our growing business and be capable to grow with us.

The Mechanical Engineer will serve as the interface between customers and the shop craftsmen, requiring a working knowledge and ability to read detailed schematics and equipment diagrams to estimate work requirements (both material and labor) to provide customers an accurate quote and timeline. Additionally, this position will include sales as key responsibility, and compensation may have a variable component tied to sales performance as an incentive.

We work in a casual but fast paced atmosphere. We have a reputation for exceptional quality and precision with a strong customer focus, and we are poised for growth in our key markets, serving customers both domestic and international in defense and commercial metal fabrication and membrane processing equipment.

The right candidate must possess:

- A high level of accuracy with outstanding attention to detail
- Analytical skills for problem solving

- Exceptional learning agility and decision making ability
- Excellent communication, managerial and interpersonal skills

RESPONSIBILITIES:

- Meets with new and existing customers to effectively quote and plan work.
- Prepares Project Cost Estimates (PCEs) for the planning, estimating and execution of metal fabricated components for use on commercial and shipboard system/equipment installations; modernization/retrofit projects; repairs, maintenance.
- Produces shop fabrication plans using CAD software (Solidworks).
- Plans, prepares, and identifies materials to meet production requirements.
- Advises management of the status of work in progress, material availability, and potential production problems to ensure that personnel, equipment, materials and services are provided as needed.
- Works with the quality control / assurance program manager to achieve a high level of quality and precision.

REQUIREMENTS:

EDUCATION:

Bachelors in Science Mechanical Engineering - education can be substituted by a strong mechanical background with over 10 years of relevant experience

Project Management Industry certification a plus but not required

KNOWLEDGE AND EXPERIENCE:

- Requires 10+ years in engineering discipline or equivalent.
- Qualified candidates must have direct relevant experience in the independent preparation of PCEs, which includes but is not limited to the following: RFQ analysis (analyzing blueprints, specifications, proposals, scope of work and other documentation) of technical job proposals
- This position requires a strong mechanical background to correctly estimate job scope and cost. Experience with US Navy/Maritime Industry experience to include experience in the development of Project Cost Estimates (PCEs) in support of US Navy Shipboard Maintenance a plus.
- Understanding of the requirements and guidelines for performing industrial work in accordance with doctrine specified in standard drawings. Understanding of NAVSEA requirements a plus.
- Strong working knowledge of welding types, equipment and processes, precision fabrication, and a working knowledge of metallurgy (Aluminum, steel, stainless steel types and uses), including welding certifications required for military (shipboard) work.
- Strong working knowledge of precision machining (CNC) methods, equipment and capabilities.
- Thorough knowledge of and experience using common shop/power tools, such as shears, press brakes, grinders, band saws, drill presses, punches, inspection equipment, forklifts, air tools, etc.
- Working knowledge of IT-based tools for planning, organizing, resourcing, and communicating - experience using an Enterprise Resource Planning (ERP) suite is a plus.
- Good understanding of System Engineering principles and requirements management.

SKILLS AND ABILITIES:

- Qualified candidates must possess excellent customer management skills. You will be a key driver of new opportunities - sales background a plus.
- Strong knowledge and skill using MS Excel, Word, and Outlook is required.
- Working knowledge of and ability to read and interpret drawings from Computer Aided Design Software (i.e. AutoCAD and Solidworks).
- Understanding of the requirements and guidelines of Quality Management Systems is highly desired.
- Utilize Enterprise Resource Planning software (i.e. Epicor) to plan and manage work.
- A combination of well-rounded developed skills in mechanical design and product management to understand the projects from a systems approach, end-to-end.

PROBLEM SOLVING AND DECISION MAKING:

Qualified candidates will possess strong analytic skills and ability to provide solutions to potentially complex mechanical problems.

PHYSICAL REQUIREMENTS:

- Ability to hear and speak to employees and outside business associates on the phone and in person.

- Ability to see the letters and numbers on a computer screen and on memos, reports and other documents (near vision).
- Ability to lift up to 40lb.

SUPERVISORY RESPONSIBILITY:

Strong interpersonal and management skill.

TRAVEL REQUIREMENTS:

Limited travel requirements in the local area (within same day travel to visit local area customers).

NOTE:

The above statements are intended to describe the general nature and level of work being performed by incumbents. They are not intended to be an exhaustive list of all responsibilities, duties and skills required by all incumbents. Incumbents may perform other duties as assigned. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. Management retains the right to add to or change the duties of the position at any time.

B. Surface Maintenance Program Management Analyst

Data Intelligence (DI)
San Diego, CA
ID: 1061
Priority: 1
RFP/Task Order: USCG LIMS
Department: Logistics

Description:
Data Intelligence (DI) is looking for a full time Surface Maintenance Program Management Analyst in San Diego, CA.

- Required skills/experience
- We are looking for a USCG (preferred)/USN Mid-Level Organization Surface Maintenance & Supply Officer

Job Description:

Reports to the Supervisory Planner/Estimator. Responsibilities include taking all ship's force, Alteration Installation Team (AIT), and shipyard work, including service and repair routines, modernization and preventative maintenance actions, and presenting as work requirement statements at the SWLIN and Line Item level. This is currently recognized as a prime function of the Planning Activity organization, and ultimately results in the development and issuance of an availability specific, integrated specification work package. Provides detailed cost estimates, to the paragraph and trade level, for developed work specifications and new work written by planners. Maintains and manages the cost estimating guide. Must be experienced in NMD-R. Candidate will also be responsible for quality review of planning products to ensure comprehensive definition of all aspects of the work request; including boundaries, scope, interferences, technical requirements, quality assurance requirements, material cost and ordering specifications, definition of trade skills necessary and detailed material and man hour cost estimates. Applicant will be required to review engineering design plans, design concepts and proposals for adequacy, test specifications and fabrication and installation methods and processes. This position requires a thorough understanding of the Joint Fleet Maintenance Manual (JFMM), ship repair planning and estimating requirements, U.S. Navy surface ship maintenance and modernization planning processes, use of the Navy Maintenance Database and use of the Validation, Screening and Brokering (VSB) automated information system.

Job Requirements:

The candidate must have five or more years' experience with developing production planning documents and estimates for work executed at U.S. Navy depot level surface ship maintenance and modernization facilities. It is preferred that the candidate has experience including: planner, estimator or shipbuilding specialist roles at Supervisor of Shipbuilding, Conversion and Repair commands, Regional Maintenance Centers, Navy Central Planning Activities, Planning for Engineering and Repair Activities, and public or private shipyards.

Security Clearance: The candidate must be able to obtain and maintain a DoD Confidential security clearance and be able to obtain a Common Access Card (CAC).

C. Engineering Technician (Ship Checker) HT-249

HireTech

San Diego, CA

Job Description:

Reports to the West Coast Ship Check Supervisor in the Third Party Planning (TPP) Execution Division. Responsible for conducting ship checks onboard naval vessels, in direct support of advanced planning work specification development. Will utilize applicable drawings and references to conduct ship checks onboard Naval Vessels, validate provided Work Notifications, determine the scope of repairs, and provide an advanced planner with amplifying information to aid in work specification development. Will also identify shipboard interferences and any other special circumstances that will impact the planning process and work specification development. Will document these ship checks with detailed information and photographs on an approved ship check form in Portable Document Format (PDF).

Job Requirements:

The candidate must have extensive knowledge of shipboard structural, mechanical, piping and electrical systems and understand Navy shipboard compartmentation lay-out. The candidate must have the ability to read, understand and validate a Work Notification and to determine the scope of work contained within that Work Notification. The candidate must be familiar with Standard Drawing Indexes, Navy Standard Drawings, blueprints, system diagrams, Navy acronyms, and other technical publications and references. The candidate must have the ability to conduct research and determine the correct reference and/or drawing required for the scope of work identified in the Work Notification. The candidate must also have physical ability to climb ladders, transit decks and perform work onboard Naval Vessels. Approximately 10% overseas travel may be required. Knowledge of Microsoft Office and ADOBE programs including word processing, databases and spreadsheets is desired.

Security Clearance:

No security clearance is required for this position, however the candidate must be able to obtain a Common Access Card (CAC) and/or Defense Biometric Identification System (DBIDS) credential to allow Naval installation access.

DProcurement Specialist (Naval Ship Repair) HT-257

HireTech

San Diego, CA

You will be part of a team designing, automating, and deploying services on behalf of our customers to GCP, in some cases alongside AWS or Azure. We have deep experience applying DevOps techniques in virtually every industry. Every week is different and the problems you will be challenged to solve are constantly evolving. We know and understand DevOps. We help build and create automation that enables our customers to save time and other resources.

If you like a challenge, you'll love it here, because we're solving complex business problems every day, building and promoting great technology solutions that impact our customers' success. The best part is, we're committed to you and your growth, both professionally and personally.

What You'll Be Doing:

- Working with customer engineering teams on a wide variety of GCP projects including but not limited to migration, containerization, and transformation
- Writing infrastructure as code (Deployment Manager, Terraform)
- GCP environment troubleshooting and setup
- Meeting customer SLAs and managing communication in case of issues
- Configuring and maintaining backup, monitoring, and alerting systems for multiple clients
- Interacting with teams and customers in different time zones to ensure 24x7 support
- Linux/Windows administration, automated deployments, scripting (Bash/PowerShell/Python)
- Participating in work sessions with clients
- Completing technical documentation
- Delivering quality work in agile delivery model in a team environment

Qualifications & Experience:

- Knowledgeable in networking and security
- Familiar with GCP services (in Databases, Containers, Compute, Store, etc.) with comfort in GCP serverless technologies
- Experience with containerization technologies such as Docker and Kubernetes
- Knowledgeable of configuration management frameworks such as PowerShell DSC, Puppet, Chef or Ansible
- Comfortable interacting with customers and able to communicate effectively
- Experience in basic administration of (MySQL, MSSQL, Postgres, MongoDB, Elasticsearch)
- Experience working in regulated environments (HIPAA, PCI, ITAR, FedRamp, etc.)
- Candidate must have the unrestricted right to work in the US without requiring sponsorship
- If you get a thrill working with cutting-edge technology and love to help solve customers' problems, we'd love to hear from you. It's time to rethink the possible. Are you ready?

B. Customer Solution Architect

Rackspace Technology

Los Angeles, CA

Full-time

Our Global Customer Solutions (GCS) team acts as a trusted technical partner to our customers and works closely with the sales, solutions and delivery teams. The GCS team is comprised of Customer Solutions Architects (CSAs) that are responsible for supporting sales as technical architects engaging with our customers during the pre-sales process.

We're looking for an experienced candidate for the CSA role working with strategic accounts in a Pre-Sales dynamic. We're looking for senior candidates with strong professional experience working as consultants prior to joining our team. Flexibility to travel and meet customers within their assigned region, as well as members of the AWS team working with us at their offices or during various events, is a requirement for the role.

The CSA will build a professional relationship with enterprise customers, acting as their trusted advisor. The role includes aspects of business development, client management, and technical consulting. The CSA will, from time to time, assemble teams of Subject Matter Experts (SMEs) from the delivery teams, to deliver education to customers and demo both internal and AWS's capabilities. Along with this will be helping the customer with decisions related to technical direction, migration and transformation initiatives.

What you'll be doing

- Develop deep professional relationships with clients and act as a trusted technical advisor for client executives.

Fusco & Orsini Insurance Services is a well-established independent insurance agency located in San Diego, California. They offer a wide range of both business and personal insurance products, along with employee benefits, in several states throughout the United States.

The organization offers competitive compensation, profit sharing, work/life balance and top benefits. Fusco & Orsini is a casual and friendly environment that enables and rewards employees for performing top work.

The agency is seeking an additional CSR to support the growing needs of new and existing customers. As a firm that operates on the premise of providing excellent customer service on a day-to-day basis, the new employee will be relied upon to bring the same value to the team.

Job Duties:

Personal:

- Address endorsements, mortgagee changes/updates
- Cancellations
- Enter new and renewal policies in the agency management system
- Verify policy documents for accuracy
- Work with clients and insurance companies on policy audits
- Assist customers with claim filing and handling

Commercial Lines:

- Additional insured certificates for contractors
- Handling notices of cancellation and notices of reinstatement for all lines of insurance
- Endorsements
- LPRs (Loss Policy Release)
- Process binders
- Add and delete vehicles and drivers
- Must understand and be proficient with the use of DocuSign
- Review policies for discrepancies
- Issue welcome kits to clients
- Work with clients and insurance companies on policy audits
- Assist customers with claim filing and handling

Qualifications:

- Minimum of 1 year of customer service experience within the insurance industry
- MS Office including Word, Excel, PowerPoint
- Property and Casualty licensed by the California Department of Insurance
- Bachelor's degree preferred
- Applied Epic experience strongly preferred

Opportunity – The FO Difference:

- Family first culture
- Consistently growing firm with opportunity for promotion
- Excellent employee benefits package to include
 - Medical
 - Dental/Vision/Chiro/Life
 - Worksite
 - 401(K) with match
 - Profit-sharing
 - Vitality
 - FLEX spending account
- State-of-the art technology to make work more productive and efficient
- Young agency
- Great work hours
